VOLUME, 9 NO. 41 EIGHT PAGES THIS WEEK. ST. CLOUD, OSCEOLA COUNTY, FLORIDA, THURSDAY, JUNE 6, 1918. $2.00 A YEAR. FIVE CENTS THE COPY.

HON. W. J. SEARS CARRIED EVERY COUNTY IN TUESDAY'S PRIMARY; WHITFIELD NOMINATED

HON. W. J. SEARS SECURED THE NOMINATION FOR CONGRESS IN THE FOURTH DISTRICT TUESDAY, CARRYING EVERY COUNTY IN THE WHOLE DISTRICT. HE EVEN DEFEATED HIS OPPONENT IN THE JACKSONVILLE WARD IN WHICH HIS OPPONENT LIVED. ALTHOUGH MR. SEARS WAS ATTACKED ON QUESTIONS OF IMPORTANCE TO THE WHOLE COUNTRY, HIS OPPONENT QUESTIONING HIS LOYALTY TO THE PRESIDENT, HIS ANSWERS APPEAR TO HAVE OVERCOME ENTIRELY THE ATTACKS MADE, AND HE WAS NOMINATED BY THE LARGEST MAJORITY EVER GIVEN IN THE DISTRICT. THIS WILL MAKE THE THIRD TERM FOR MR. SEARS AS REPRESENTATIVE OF THE FOURTH FLORIDA DISTRICT IN CONGRESS.

Only one congressman now serving from Florida met defeat Tuesday. Hon. Walter Kehoe, of Pensacola, was defeated by J. H. Smithwick for representative from the Third congressional district.

All the state officers that were candidates to succeed themselves were successful in the primary.

State Races.

For Justice of the Supreme Court, James W. Whitfield was nominated by a large majority over Rivers H. Buford.

For member of the State Tax commission, Cade Shackleford and J. C. Brown are reported so close that an official canvass of the second choice votes are said to be necessary to decide who will fill the long term.

For the short term on the Tax Commission, unofficial reports state that W. M. Holloway is nominated.

For State Auditor, J. Will Yon has been renominated.

Sears Wins.

Hon. W. J. Sears was nominated to succeed himself in Congress from the Fourth District, having carried by a large majority every county in the district.

Frank Clark was successful over C. E. Davis in the Second Congressional District.

Walter Kehoe was defeated in the Third District for Congress by J. H. Smithwick.

Hon. H. J. Drane, of the First District, was unopposed for Congress.

St. Cloud's Vote.

County Commissioner, District No. 4.

J. Will Yon	88

Braxton Beacham Wants Public to Know the Wheat Situation

Federal Food Administrator Braxton Beacham is anxious to have the people of Florida fully acquainted regarding the status of conditions relative to the wheat supply now available in this country and the prospects of the future. He therefore is asking that the newspapers in the state give the most prominent space to the following statement issued from Washington and which is directly from United States Food Administrator Herbert Hoover:

Recent press dispatches widely circulated through the country have given the wholly false impression that there is no longer need for rigorous conservation of wheat and flour. The Food administration declares that every aspect of the wheat situation, both present and prospective, intensifies the need for the greatest possible limitation in the American consumption of wheat products. If present restrictions should be in the slightest degree relaxed it would result in serious want for the people of Europe before the new crop can reach the market.

The Food Administration's estimate of the position on the first of June, indicates a total available supply until the new harvest, including the grain which will be available from the farms in country and terminal elevators and mill elevators, of about fifty-six million bushels. Of this thirty million bushels must be exported before the new wheat is available for export. If we are to maintain the absolutely necessary shipments to our army and the allies, that leaves about twenty-six million bushels for domestic consumption for the next two months.

Normal American consumption is something over forty million bushels a month, so that the most liberal consumption at home would be only one third of the normal. In addition to the wheat on the farms and in elevators, there is always an indeterminate further amount in transit and in dealers' hands, and this can never be reckoned in the flour available for use for export and use at home. As a matter of fact this stock is not actually available since these supplies must remain constantly in flow; they remain a permanent stock, the removal of which would later cause a period of acute shortage in distribution before new wheat would be available.

There is further an inclination to include new crop prospects with present conditions, which has led to confusion. The harvest will not be generally available in flour until the middle of August or early September, although in the extreme South it will be somewhat earlier.

At a recent meeting of the Federal Food Administrators in Washington, representing all forty-eight states, it was the unanimous view that even if the harvest does prove abundant it will be the first duty of the American people to place every grain they can save into storage as against possible bad years ahead. In consequence, there should be no anticipation of unlimited wheat bread until the war is over.

Some of the most inconvenient restrictions can no doubt be modified with the arrival of a large harvest, but if we are honest with ourselves we will maintain restrictions requiring the use of some substitutes both domestic and commercial; we will continue the requirement of high milling extraction and the elimination of the non-essential use of, and waste in flour and bread.

It is worth remembering that the famine in Egypt eight thousand years ago was saved by a little governmental foresight and it does not require any illuminating dream to anticipate that so long as the war lasts with its increasing drafts for soldiers and munition workers, the world will steadily produce less food if we are wise, a great harvest will mean the willing building up of great national reserves.

CARLSON BUYS OUT CORNWALL.

C. E. Carlson, president of the Peninsular Engineering Co., this week purchased the interest of S. N. Cornwall in the compjny, and Mr. Cornwall has returned to his home, Tampa, Fla. Mr. Carlson has been the largest owner of the engineering concern since its organization and has been the general manager. He will now give more time to the affairs of the company, who are the contractors on the asphalt road to lead through this city to Narcoossee and on to the eastern boundary line of the county.

Even Children Cheer

Children in France have learned what the Y. M. C. A. stands for and when they see the gray uniforms of the women canteen workers they gleefully shout Y. M. C. A.! Y. M. C. A.!

American sailors last year deposited close to a million dollars in the branch bank maintained at the Brooklyn Navy Y. M. C. A. building.

EVANS RESIGNS AS CO. AGT.

Owing to ill health Mr. B. E. Evans, who has served Osceola County as Federal Farm Demonstration Agent for several years, resigned his office on June 1. A. M. Highfield has been temporarily assigned to the work in this county, and will work under the Federal department until the county commissioners secure a permanent successor to Mr. Evans.

Mr. Evans and his mother will go to Ohio for the summer where it is hoped he will regain his health. Mr. Evans has a host of friends throughout the county who wish him a speedy recovery.

Athletic Stars Enlist

Scores of former athletic stars are enlisting for service with the Y. M. C. A. to instruct and help the American soldier oversea to keep himself physically fit to fight.

Stand fast with a brave heart! Our spiritual support reaches the men in the battle line.

Florida Again Breaks Record In Offering Army Volunteers

MEN TO NUMBER OF 325 ENLIST DURING MONTH OF MAY, MARKING HEAVY INCREASES OVER MARCH AND APRIL—MORE VOLUNTEERS WANTED.

Florida continues to break records in offering volunteers to the regular and national armies as is shown by the fact that 325 men were accepted for enlistment during the month of May. This is an increase of 43 over the report for April, which exceeded that of March by 54. The record is all the more remarkable when the facts that enlistment is temporarily closed to negroes and that many small cities and towns are practically depleted of men of enlistment age are considered.

Men are still wanted for all branches of the service, with the exception of the aviation section, and many Floridians are expected to respond during the summer months. The volunteer call is for men between the ages of 18 and 21 and 31 and 41 years. Those desiring to enlist are requested to call at the nearest recruiting station or upon their postmasters for information, examination and transportation.

Lieut. M. J. DePriest, recruiting officer for Florida, considers the newspapers of the state greatly responsible for the showing Florida has made. "They have been liberal and patriotic indeed towards this branch of the service," he said, "but that is so characteristic of newspaper men that comment is unnecessary."

War Savings Stamp Report of Continuing Sale Campaign

Immediately following the meeting to be held in Kissimmee Friday, June 7th, at which plans will be formally adopted, the campaign for the sale of war stamps will commence and will continue until January 1st, 1919, during which time it is expected that this county will fill its quota of $260,000. In order to do this it will be necessary for our people to rally to the occasion.

If every man, woman and child in the county would lay aside ten cents each day during the remainder of the year and purchase war stamps with the money the allotment would be filled without any extreme sacrifice by any one, this of course can hardly be expected, therefore it will be necessary for some to purchase the full amount allowed by law, which is $1,000, and for everybody, both white and colored to do their very best. It is hoped that all of those who are able to do so will buy $1,000 worth of stamps early in the campaign, also that there will be many who will buy $100 worth and upward.

As the first step in the campaign, post cards will be mailed taxpayers and property owners, a large number of volunteer workers will be needed in addressing these cards; it is also desired that advertising matter be properly distributed; to those entrusted with this responsibility it is expressly requested that it be given careful attention.

District chairmen will please keep in mind the importance of thorough organization of their districts, and see that reports which will be required are furnished promptly.

It is very important that the aid of all local organizations, such as the churches, lodges, clubs, etc., be obtained throughout the campaign; the volunteering of such organizations for service without waiting for solicitation will be appreciated; all children's organizations are likewise desired; the boy and girl scouts can be of very valuable assistance.

The aid of the ladies throughout the entire county is absolutely indispensible and without their assistance it is quite certain that the results would be disappointing. Local chairmen are urged to see that they are given ample opportunity to take part in the campaign and that full credit is given them for their work.

D. G. WAGNER, Chairman,
Osceola County W. S. Committee.

Lend Your Money As Freely As They Are Giving Their Lives

You don't have to fight, you don't have to die.

But—

Your son does, or your brother who is now across the way—or the kid now in khaki to whom you used to give pennies a short time ago.

That money you have laid away for "a rainy day"—wouldn't you give every nickel of it to keep a Hun's knife away from his throat?

Well, the Hun is here, and so is his knife—and so is the "rainy day"—it's raining now, raining bombs and sharpnel upon our boys "over there."

JUNE 28th
NATIONAL WAR SAVINGS DAY

On that day the nation will call upon you, not just your neighbor—but you—to pledge yourself to the purchase of a certain number of War Savings Stamps during 1918.

Lend your money as freely as they are giving their lives.

National War Savings Committee

D. G. WAGNER, County Chairman

A. F. BASS DEFEATS TRIPLETT FOR COUNTY COMMISSIONER BY VOTE OF 225 TO 67

In the primary election held Tuesday A. F. Bass, present member of the Board of County Commissioners from District No. 4, embracing the northeastern part of Osceola county, was re-nominated by a vote of nearly four to one over his opponent, S. J. Triplett.

In the city precinct there were 283 votes cast, and of these 207 were for A. F. Bass and only 63 for Triplett, while at Deer Park A. F. Bass received all the votes cast and at Narcoossee the vote was overwhelmingly for Bass.

Mr. Bass has been county commissioner from the St. Cloud district for eight years, and the fine record he has made as a representative of this section accounts for the good vote he received in Tuesday's election. His opponent made some strenuous attacks on his record, but the result of the election showed that the people who pay taxes have formed a differnt opinion from that of those who were opposed to Mr. Bass.

Other Officials Elected.

For Representative in the Legislature N. C. Bryan, of Kissimmee, was renominated over S. W. Porter, of this city and Fred M. Bass, of Kissimmee. This will make the third term for Mr. Bryan.

E. L. D. Overstreet, was nominated by a vote of more than two to one as commissioner from the Shingle Creek and Campbell Station sections.

B. H. Guy, of Whittier, was nominated over two opponents as commissioner from the Whittier district.

Riley Godwin becomes the school commissioner from the St. Cloud district unopposed, to succeed John H. Baisden, who did not enter the race for nomination.

John Partin was nominated unopposed to succeed J. K. Hilliard as county commissioner from the East Kissimmee district, and Ernest Mach was unopposed as commissioner from the West Kissimmee district.

Commissioner Bass Appreciates Large Vote Received Tuesday

To the Voters and Taxpayers of the Fourth Commissioners' District:

I wish to express my sincere appreciation for the overwhelming majority given me in the primary election last Tuesday, and for the expression of confidence in my ability and efforts directed in behalf of this district and for Osceola county in general.

I fully realized that all fair-minded voters and taxpayers would not fail to go into the records for the facts as to my official acts during the eight years that I have served this district, and while several months ago I made up my mind not to be a candidate because of the sacrifice of time from private business affairs that the duties of commissioner require, I was so strongly urged by a large number of my friends to run again, they contending that I owed it to myself and to the district to continue until the development of this section, begun while I was on the Board was completed, and that I owed it to the taxpayers of the district to make a further sacrifice of personal affairs to continue on the board. Being thus confronted by the best people in the county and in my district, I announced as a candidate for re-nomination and in the last two weeks was attacked in a manner uncalled for, but which attack seems to be in keeping with the tactics of those who opposed me, but, thanks to my friends and the majority of taxpayers, and to the open book of my record, no one was misled by these attacks, and I have received a larger vote than ever.

I shall continue to give the county the best service possible and to endeavor to obtain for this district all that is due.

The result of this election should cause all those kickers who have talked so much about my recommendations for appointment of the bond trustees for this road district, to realize that not only my official actions as commissioner, but my personal recommendations have met with the hearty approval of the large majority of the people of this district and of the county.

Again thanking my friends for the large majority received, I am.

Very truly yours,
A. F. BASS,
Commissioner Fourth District.

The Bond Trustees' Statement Replied to by Signer of Petition

As one of those who signed the petition to the Governor—which of itself refutes the contention of these gentlemen, that their critics are small, if not, non-taxpayers and unscrupulous persons &c., permit me to ask if any of the banks in this county were officially requested by their board to send in sealed bids for the reception and care of the funds in question.

It is not my purpose to act as Godfather for any of these institutions, each of them can take care of itself.

Now as to facts—I was informed by Mr. Bass that it had been decided to pace the proceeds of this bond issue with the State Bank, prior to the formation of the Bank of St. Cloud, owing to courtesies shown to the Board of County Commissioners—as a Board—on various occasions.

This being so, then the members of the Board of Trustees, when nominated by him, became merely his nominees to carry out his wishes.

The composition of their reply, leads me to believe that it was indicted by some other person, possibly I may be mistaken; but its phraseology is somewhat familiar, for this reason I regard the Board's excuse, relating to the Bank of St. Cloud ,and its connection with the Witham system, as emanating from the same source, an afterthought in order to divert attention from certain facts relating to the failure of the late First National Bank.

Furthermore had the Trustees been as solicitous as they state, with regard to saving the cost of premiums on bonds, they would have enquired of the various agents in this county as to the rates thereon and not confined themselves exclusively to one agent.

Personally I have no ill feeling against Mr. Bass or any of the members of the Board of Trustees.

I have known Mr. Bass for many years, and whenever he has needed my assistance in any matter pertaining to the good of his district, he has got it; Dr. Chunn and I are on the best of terms—no one could fall out with him; Ed Whaley, one of my oldest friends; Mr. Clark a gentleman from the first to last; all good fellows in their way; but I regret the unpleasant position in which they were placed.

Those signing the petition to the Governor, were all leading citizens and taxpayers of the town. In drawing attention to the matters stated therein, they considered that they were simply doing their duty.

My business is in this town; in addition thereto I represent a large number of out-of-town tax-payears, and I propose making a protest, and endeavoring to protect the best interests of St. Cloud whenever necessary. I have no favers to ask, but I am always ready to do what I can for the benefit of St. Cloud, whenever the occasion arises.

A. E. DROUGHT.

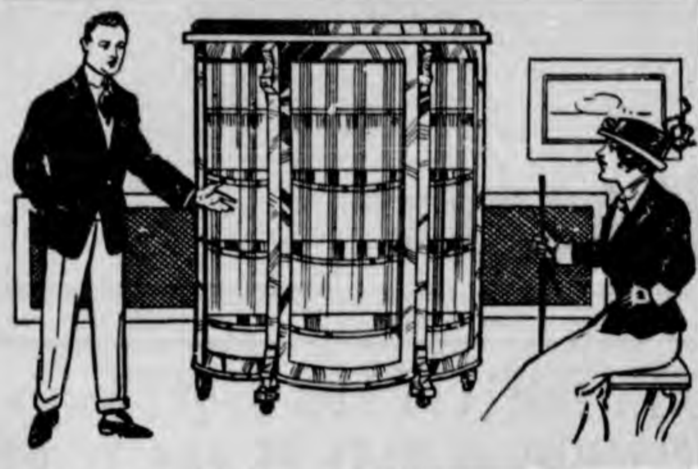
TRYING TO LAND SAWMILL

The Board of Trade held an interesting meeting last Monday, when the proposition of locating the large sawmill near the city was discussed for some time. Capitalists have bought a large tract of timber just west of the city and were preparing to build a large sawmill on the site, but efforts had been made by Kissimmee people to locate the mill at that point. The Board of Trade of St. Cloud, through its president S. W. Porter is trying to induce the new concern to build the mill near St. Cloud. This movement is in the interests of the whole city, as the merchants of our city would naturally secure an increased business from the new mill if it locates near here. A representative of the new concern was in the city on Monday conferring with Mr. Porter and other members of the Board of Trade in regard to the matter.

It is believed that the matter will be settled this week and that the new concern will locate the mill on their timber lands which are just west of the city.

NEW UNDERTAKER WITH CARLSON

John Newton, a well known wholesale and retail undertaker, has become associated with C. E. Carlson, our local funeral director, and will be in charge of the chapel at all times when Mr. Carlson is away. He consummated the deal this week, and is now on the job. Mr. Newton is one of the best in his profession and associated with Mr. Carlson will relieve Mr. Carlson while he is away looking after his other interest in connection with his contracting business.



Ornamental Furniture

After the necessities in furnishing a home, such as beds, tables and chairs, come the pieces which give an atmosphere of beauty, elegance and prosperity.

Our China Closets and Sideboards

cannot be surpassed for their decorative qualities and they will delight the eyes of every fastidious housekeeper. These cabinets, appointed with gleaming silverware and sparkling cut glass, will help to make your home an abode of luxurious comfort.

The Greatest
Bargain in Real Estate
EVER OFFERED IN
St. Cloud, Florida

I have become the owner, through barter, of a fine five-room bungalow in St. Cloud that I have no use for, and want to dispose of at a sacrifice, less than one-half of what it would cost to build the house alone today.

Its builder, and former owner, is prevented from returning to St. Cloud by reason of prolonged family sickness and financial stress.

The house consists of a large central reception, or family room, bed rooms, dining room, and kitchen, four porches screened, bath room, and lavatory pump on one of the porches, and many other conveniences. A very pleasant residence.

There is an outside laundry, kitchen, and storage building, also a garage, and other necessary outbuildings. Grape arbor in fruit and trees.

One block to paved sidewalk, close to churches and school.

I will accept Eight Hundred Dollars, in three equal annual payments, back payments to be secured by mortgage, and insurance, and to bear interest.

Or Seven Hundred and Fifty Dollars, CASH.

If not sold before October first, the property will be for rent.

41-eow **F. F. H. POPE.**

STATE COUNCIL OF DEFENSE

The War Department desires photographs, drawings and descriptions of bridges, buildings, towns and localities now occupied by the German forces in France, Belgium and Luxemburg and likewise in that part of Germany lying west of the line running north and south through Hamburg. Anyone having any of the above in their possession should send same immediately to H. S. Howard, Executive Secretary, State Council of Defense, Gainesville, and the same will be placed in the hands of the Department.

The State Council of Defense has appointed Mr. Wm. F. Cocke, State Road Commissioner in Rural Motor Truck Express Lines. Mr. Cocke will likely attend a conference of committeemen in Washington, June 4th, to consider plans for the establishing of such lines in the state.

The supervision of the solicitation of funds for war relief has been placed directly in the hands of the State Council of Defense and anyone who desires information regarding any society soliciting funds should write the State Council office, Gainesville.

The Alien Property Custodian desires information concerning enemy-owned property of any and all kinds, and anyone able to furnish information of this kind should communicate with the State Council office, Gainesville.

What the Department of Agriculture Is To Feed Nations

Little Items About Big War Jobs that Are Helping American Farmers

To Protect Army Stores From Insects.

Millions of dollars worth of food and clothing intended for use overseas and stored in the government warehouse at the Bush Terminals, New York, will be protected from damage by insects through arrangements whereby the War Department will use the knowledge on stored-product insects in the possession of the Department of Agriculture. The stored supplies originated in all parts of the world and are likely to contain insects that will multiply and cause great damage in storage, particularly during the summer. To search out and treat infestations in the early stages may save millions of dollars. Dr. E. A. Back of the Bureau of Entomology has been placed in charge of the work, in co-operation with the War Department.

Develops a Superior Asparagus.

A new strain of asparagus that is larger, more uniform and more productive than the old varieties and in addition is highly disease-resistant, has been developed through ten years of work by J. B. Norton, a plant breeder in the Bureau of Plant industry, who introduced, tested and hybridized asparagus from all parts of the world. Introduction of the new strain is expected eventually to stamp out the "rust," a destructive disease that swept over the country a few years ago. Commercial quantities of the new type recently sold in Washington, D. C. for more than double the price of other asparagus.

Moving Army of Laborers to Harvest Wheat.

Additional help to harvest the wheat in the Central Western States will be supplied by an army of workmen moving from Texas north to North Dakota with the season of the harvest. Definite plans for distribution of this labor have been made by the Department of Agriculture's farm help specialists co-operating with the Department of Labor and with county agents in these wheat producing states. It is estimated that 80,000 men will be needed to harvest the wheat crop in Kansas, and that about 50,000 of this number will be furnished by the towns and cities of that state while the remainder will go into Kansas from Oklahoma and Texas when the wheat harvest is finished in these states.

Many Food-Destroying Animals Killed.

Sale of the skins of stock-destroying and other animals by nearly 200 animal hunters of the Bureau of Biological Survey of the Department has netted during the current fiscal year up to May 20, $79,780.77, according to records of the bureau. This compares with a total of $34,751.10 for the fiscal year 1917, and $8,614.08 for the fiscal year 1916. The increase is due to better organization of the work and to the increased values of furs. The work of the animal hunters is directed primarily against the coyotes, bobcat, lobo or timber wolf, mountain lion, lynx and stock-killing bear, but the trapping operations also resulted in the capture of a large number of badgers, civet cats, foxes, martens, opossums, raccoons, skunks and weasels. From the beginning of this work in the fall of 1915, when it was started on a small scale, up to January 1, 1918, more than 1,201 wolves, 51,230 coyotes, 144 mountain lions and 6,521 bobcats had been killed by trapping and shooting, besides great numbers destroyed by carefully conducted poisoning campaigns.

Protecting Army Remounts From Disease.

Forty-seven additional veterinarians, making a total of seventy, have recently been detailed by the Bureau of Animal Industry to protect horses, which are being transported for war purposes, from influenza, distemper or shipping fever, diseases which have caused enormous losses.

Weather Bureau Aids Aviation And Artillery Service

In co-operation with the Signal Corps, United States Army, the Weather Bureau is providing for and maintaining for the duration of the war aerological and meteorological observations at a number of aviation and artillery fields. For use at these fields tables of mean values of atmospheric pressure, temperature and density and a paper on "Meteorology and Aeronautics" have been published.

In connection with searchlight tests conducted in February and March at Washington by the Engineer Corps of the Army, the Weather Bureau made some kite flights at night. Other flights were made in daylight in connection with studies of atmospheric electricity conducted by the Bureau of Standards.

Food Leaflets in Foreign Languages.

The United States Food Leaflets recently published by the Department of Agriculture and the Food Administration have been translated in some states by local representatives into 11 foreign languages and are now being distributed among foreigners in the United States. Twenty leaflets, each carrying its message of food sense and food economy in four pages, make up the series. Besides the English version they have been published in Yiddish, Armenian, Italian, Polish, Portuguese, French, Greek, Swedish and Lithuanian.

State Legalizes Municipal Fuel Yards.

Mississippi has enacted a law authorizing the establishment and maintenance of municipal wood and coal yards during the period of the present war and for one year thereafter, as a means of meeting the fuel shortage. This is said to be the first legislation of the kind by any state. Municipalities taking advantage of this new law may provide the necessary machinery, transport, sell and deliver fuel, and are authorized to use for this purpose general municipal funds, and also, with certain restrictions, to borrow money if necessary.

More Poultry and Eggs on the Way.

Four district men and thirty-six state leaders, all trained poultry specialists, are carrying out the Department of Agriculture's program to secure large increases in poultry and egg production this year. In addition to these workers there are eleven extension poultry club men who are encouraging more efficient poultry production among the boys and girls in their various states. Recent reports from these poultry extension specialists indicate that normal production will be maintained in practically every section of the country this year, in which they are working, and in many localities an increase over previous years is expected. The appeal made by the department specialists to city people to increase food production by utilizing their table scraps in feeding small back-yard flocks of hens is meeting with marked success.

The Department's Service Flag.

In front of the main building of the Department of Agriculture hangs a big service flag with the numerals 1,196. Since the flag was made the number of former regular members of the department now in the army or the navy has risen to 1,537. In addition, 4,511 employees, including 958 women, have been lost to the department in other ways since the declaration of a state of war with Germany. Most of the 6,048 who have left the department's service are experts in their fields and were performing important duties in the department which required long training and peculiar qualifications—some of them special technical qualifications. The department has been in the position of having to increase its forces greatly to perform the old duties and meet the war time demands for extended operations while at the same time it has been losing large numbers of its most effective and trained employees. The difficulties in securing men of the requisite training and of retaining those already in the service have been very great.

Reduction in Hog Cholera Losses.

One hundred and sixty trained veterinarians of the Department of Agriculture are working in 33 states, in co-operation with agricultural colleges, state authorities and local veterinarians, to control hog cholera. The effectiveness of their efforts and the success of modern methods of combating this disease is shown by the fact that during 1915 the hog mortality from disease was 7,000,000 head, as compared to 3,000,000 in the year ending March 1918, 90 per cent of the deaths being due to hog cholera. The losses in 1914 were equivalent to the normal consumption of pork and pork products by the entire population of the United States for 37 days.

Three New National Forests.

President Wilson has issued a proclamation establishing three new National forests in the East—the White Mountain in Maine and New Hampshire, the Shenandoah in Virginia and West Virginia, and the Natural Bridge in Virginia. Each forest represents the final step in carrying out the law passed by congress in 1911 for the purchase by the government of forest lands on the watersheds of navigable streams. Additional lands which have been purchased in the White Mountains and Southern Appalachians will be proclaimed National Forests as their accumulation reaches a point justifying the step.

Farmer Attains "Efficiency."

To show how farmers of the United States are meeting the shortage of farm help a field agent of the Bureau of Crop Estimates in a recent report told of seeing a farmer in Indiana driving a team of six horses hitched to a disc plow and leading three horses drawing a harrow. He was working nine horses and two modern farming implements, and doing the work of several men and teams under the old system of farming.

Spraying "Circles" for Farmers.

Community co-operation in spraying, particularly in the control of such diseases as potato late blight and tomato leaf spot, is urged by the United States Department of Agriculture. The Department is suggesting to county agents and extension patrologists the early organization of such spraying "circles" to deal more effectively this year with such destructive plant diseases. A community spraying outfit with a man and team continuously employed for the entire season is both economical and efficient, department officials say, and proved a successful plan in Vermont and New York last year. In one New York community the average spraying cost per acre for the season was as low as 65 cents, while the cost of one application averaged 13 cents an acre. Detailed reports of the organization and operation of the community spraying circles as they were conducted in Vermont and New York are being made available by the department to workers.

A Guide to Baking

A guide to baking with helpful facts briefly told has been issued by the office of Home Economics in the form of a card to be hung in a convenient place in the kitchen. It carries the message of saving wheat by the use of substitutes and gives amounts of substitutes equal to one cup of flour. Good combinations of substitutes, with cautions to be considered in their use in baking, are also given. An old recipe for making bread is compared with a new one in which 1 3-8 cups of barley and one cup of corn flour take the place of 2 cups of wheat flour.

Co-Operate in Crop Estimates

Co-operation in Wisconsin between the Bureau of Crop Estimates and the State Department of Agriculture is proving very satisfactory, according to expressions of state officials. The reports are said to be more dependable because of better sources of information and better organization secured through the co-operative arrangement, which has eliminated duplication of work and expense. Similar co-operation has been established in Utah, Missouri and Nebraska and is under consideration in other states.

Sheep Specialists Aid Beginners.

The sheep extension specialists appointed by the Department of Agriculture and now at work in 15 states are giving special assistance to prospective sheep raisers in aiding them in procuring satisfactory stock and in providing necessary equipment to insure successful outcome of the new ventures. In this way people who are unable to retain for breeding purposes the full number of the female increase of their flocks, are arranging through the extension specialists and local county agents to have their surplus stock go into the hands of other persons who are looking for stock. This has been an important factor in conserving breeding stock which might otherwise have gone to the market for immediate slaughter.

What Meat Inspection Costs.

In the fiscal year 1917 the cost of the Federal meat inspection was about 5½ cents for each of the 63,000,000 animals slaughtered. This covered the entire service from the first inspection of the live animals to the final examination of the meats in the finished products when ready for delivery to dealers or customers.

Extends Live Stock and Meats Service

Local offices of the Bureau of Markets have been opened in East St. Louis, Salt Lake City, Pittsburg, Pa., and Louisville, Ky., to handle reports on livestock movements and meat trade conditions at these markets.

HOLD YOUR LIBERTY BONDS

The American who buys a Liberty Bond and forthwith sells it has performed only half a service for his country. To buy bonds and then sell them immediately tends to make the war burden of the country heavier instead of lighter, as it decreases the market value of the bonds.

Liberty Bonds are the safest and soundest and one of the best investments in the world. To sell them unless imperatively required is not good business, is not good Americanism.

WATCH THE LICE

on chicks. These parasites sap the very life blood out of them. Dust the hen at night with B. A. Thomas' Louse Killer and your troubles are ended. It also kills bugs on cucumbers, tomato, and squash vines. We sell it to you and if it does not make good, we will.—H. C. Hartley. June

THE WOMAN CITIZEN

IS SUFFRAGE WORK WAR WORK?

There foregathered in executive council in Indianapolis last week a group of women, representing a vastly larger group of women, whose collective activities in war work, it is safe to say, have resulted in more actual achievement than have those of any other specific group of women in the United States.

In one state alone, the state of New York, their self-apportioned share of the first two Liberty Loan drives was over $10,000,000.

In various states their organizations have assumed complete charge of such patriotic tasks as the military registration, while taking over, as well, large details of the Red Cross relief program, the conservation and thrift programs, and the Liberty Loan campaigns.

Besides which, they have organized a chain of hospital units and have assumed their up-keep, about $125,000 per year to begin with, for the relief of the women and children of France.

From the beginning of the war these women have leaped at every presenting opportunity to help, to stand by America, to see the war through.

No detail of the war program has been slighted by them.

The crassest and stupidest critic has been silenced by the eagerness of their loyalty and the effectivness of their war service.

These women are the suffragists of America and it was the duly appointed representatives of their 2,000,000 membership that foregathered in the council meeting at Indianapolis.

In all their counseling the war stood out foremost.

It filled their minds.
It thrilled their hearts.
It informed all discussion.
It was part of every report.
It conditioned all prospects.
They were logical women.
They were balanced.
They were practical.

You could not listen to them without realizing the coherency of their purpose and intention.

And never for a moment did they visualize suffrage work as anything but war work.

It was there in the war work scheme just as Red Cross work and Thrift and Conservation and Liberty Loan work there.

Were they wrong?

Is woman's right of self-government not pertinent to the world's right of self-government?

Is practice not pertinent to theory?

Is the thing we are fighting for not pertinent to the fight?

As well say that the freeing of the slaves should have been deferred until the Civil War for their freedom was over as to say that woman's right of self-government should not be considered until the war for self-government is over.

Suffrage work is war work and as such must go forward unceasingly until the war for democracy ends in triumph.

The democratic state central committee of Connecticut endorsed the Federal Suffrage Amendment, when in session at New Haven on April 23. By a vote of 15 to 11 the following action was taken:

Resolved, that the Democratic Central Committee of Connecticut does hereby endorse the Susan B. Anthony amendment to the Federal Constitution, enfranchising women in the United States, and urges favorable action thereon by the United States Senate.

There are now 200 women in the rural mail service and the postoffice department is asking for more.

THE SUFFRAGE ALLIES

"The time is ripe to extend suffrage to women," says Premier Orlando, in an interview granted to the "Giornale d'Italia." "I hope the present legislature may grant it."

New York suffragists are delighted to hear that Italy is going to join the "suffrage allies." England is in the lead, so far as actual suffrage is concerned; France has promised it, and the United States government has passed the Federal suffrage bill through one House. It remained only for Italy to acknowledge the pertinency of the topic to the times. Will the United States Senate kindly take note?

"WHAT I 'SPISE."

A prominent anti-suffragist, in addressing the relic of the New York State Association opposed to Woman Suffrage the other day, said she despised some of the suffragists, but was forced to admire some of their attributes, notably, their perseverance. All of which reminds us:

Erastus, having approached the business end of the mule three times with a caution that went down three times with the rest of him, was heard to remark as he arose the last time and sidled away indignantly: "Thass what I 'spise about a mule."

TREASURY REDUCES SHIP INSURANCE RATES

For the fourth time since the government undertook the insurance of American ships the War-Risk Insurance Bureau of the Treasury has reduced the rate charged for the insurance.

The last reduction, made last week, reduces the rate on hulls and cargoes through the war zone from American ports to ports of Great Britain and the Atlantic coast of France from 3 to 2 per cent. The original rate was 6½ per cent.

This is substantial testimony to the curbing of the German U-boat, a process that has been going on steadily since the American fleet went on the job.

LODGE DIRECTORY

Odd Fellows

St. Cloud Lodge No .66, I. O. O. F., meets every Tuesday evening in the G. A. R. Hall. Fred B. Kenney, Secretary. Visiting brothers always welcome.

Loyal Order of Moose, No. 1577, meets every first and second Wednesday, in the Moose Home, Miles Building. L. A. Guessaz, Secretary. Visiting members welcome to home at any time and will be given hand of fellowship at all meetings.

AMERICAN MOTHERS, WATCH YOUR CHILDREN'S TEETH!

One of the facts which American mothers must face squarely if they are to do their part in building the future nation is concerned with the condition of the teeth of American children. How serious a matter this actually is is illustrated in the report of the Provost Marshal General to the Secretary of War, regarding the rejection of recruits for the new army in the first draft. Over a third, counting rejections at camps, were rejected for physical disqualifications. A preliminary analysis of the cause of rejection in 10,000 cases, shows that more were turned back for defective teeth than for any other single cause except defects of the eyes.

Such a showing as this is the more discreditable since for years we have known that the children in our public schools have bad teeth, and the remedies for this condition have been understood. It is true that many mothers live at an inconvenient, even prohibitive distance from dentists; and many more feel unable to [illegible] expense of dental work; but one of the greatest sources of danger to the children is the fact that so many mothers do not realize the serious and far-reaching effect of neglected teeth and do not understand how to prevent the need of expensive dental work.

The quality of every child's teeth is partly determined before he is born when the embryonic teeth are growing. This is one of the many urgent reasons why the mother's diet and general hygiene should be scrupulously watched and every means to keep her in excellent health should be employd. Aftr the baby is born the baby's food becomes a matter of prime importance if his teeth are to be strong. These matters are treated in two pamphlets, Prenatal Care and Infant Care, which will be sent free of charge upon request to the Children's Bureau, U: S. Department of Labor, Washangtonl D. C.

As the child grows out of babyhood, not only the diet, but the care of the milk teeth must be clearly understood. It has been demonstrated that the child's first teeth can be so preserved that he arrives at the age of second dentition without a decayed tooth, and and permanent set comes through in perfect condition. Like everything else in the child's care this depends more upon the patient and intelligent care given each day by the mother in the home, than upon outside help. Let us all, American mothers, resolve that our children shall not come to their school life nor later to their adult life as American citizens in anything less than the most perfect condition which it is possible for us to secure.

CONVERSION OF LIBERTY BONDS

Liberty Bonds of the first issue, Liberty Bonds of the second issue, and Liberty Bonds obtained by converting bonds of the first issue into bonds of the second issue can be converted into bonds of the third issue during the six months period beginning May 9 and ending November 9, 1918.

Delivery of the bonds issued in conversion can not be made prior to July 1, but bonds presented for conversion on or before that date will be retained by the treasury and a non-negotiable receipt issued therefor. Interest will be adjusted in each case between the government and the bond holder.

After November 16, 1918, no further rights of conversion will attach to the 4 per cent bonds, either the original bonds of the second loan or those obtained by conversion of bonds of the first loan. Bonds of the first issue, however, will still have the privilege of conversion into any bonds issued, at a higher rate of interest than 3½ per cent, before the termination of the war. All of the 4¼ per cent bonds are non-convertible.

Bonds for conversion may be surrendered at any Federal Reserve bank or at the Treasury Department. Registered bonds must be assigned to the Secretary of the Treasury, but such assignment need not be witnessed.

On conversion of registered bonds, registered bonds only will be delivered, neither change of ownership nor change into coupon bonds being permitted.

Coupon bonds, however, may be converted into registered bonds upon request. Coupon bonds must have the May 15, or June 15, 1918, coupons and all subsequent coupons attached. Coupon bonds issued from conversion will have only four per cent coupons attached and later must be exchanged for new bonds with the full number of coupons attached.

All bonds issued upon conversion into 4¼ per cent bonds will be dated May 9. The bonds secured upon conversion of bonds of the first loan and bonds obtained by conversion of bonds of the first loan into 4 per cent bonds will carry interest from June 15. Bonds issued upon conversion of 4 per cent bonds of the second issue will carry interest from May 15.

THE THIRD LIBERTY LOAN

The Third Liberty Loan yielded $4,170,019,650, subscribed to by about 17,000,000 buyers. Secretary McAdoo congratulates the country on the result, which he says is "irrefutable evidence of the strength, patriotism and determination of the American people.

The loan is larger and the number of subscribers much greater than any previous loan of the country, and every bond buyer bought with the full knowledge that he would be allotted the full amount of his subscription.

The great subscription was made despite the fact that the country has been called upon to pay since the preceding loan income and excess-profit taxes . approximating $3,000,000,000 The loan and these taxes will make a total of about $7,000,000,00 turned into the Treasury of the United States since the second loan, including the month of June. Yet every district over-subscribed its quota, the Minneapolis district leading with an over-subscription of 12 per cent.

ACT QUICKLY

Do the right thing at the right time.
Act quickly in time of danger.
In time of Kidney danger, Doan's Kidney Pills are most effective.
Plenty of evidence of their worth in the vicinity.

Mrs. C. Barr, 84 Chapel Street, Bartow, Florida, says: "I suffered from back ache a year ago. A steady dull ache right in the small of my back made me feel miserable. I felt all played out and didn't have much ambition to do my housework. I didn't let myself get bad off because I heard of Doan's Kidney Pills and one box which I got at the drug store entirely cured me of this attack. The backache and other troubles left me and I felt like a different woman."

Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Barr had. Foster-Milburn Co., Mfgrs., Buffalo, N. Y. 41-1t

GOAT RAISING IN FLORIDA

There is a fine field for Angora and milk varieties of goats in Florida. The angora thrives on a rough, brushy pasture where other kinds of stock would find a scant living. On account of his great liking for leaves, brush and weeds, the angora lives well and in the course of time transforms a brushy waste into a pasture suitable for other kinds of stock. Any man who has a suitable pasture for goats and will give them a chance can make a financial success. There is certainly a good deal of brush and scrub pasture yet open for goats in Florida.

CAPT. COPE

Says the State Marketing Bureau---

The United States Treasury issues notice that it disapproves of the use of Savings Stamps.

The wool clip of the country is to be handled by the government, at prices ranging from $1.03 to $1.85, for sixteen different grades.

The price of corn is high—too high for a man to waste in the ground seed which will not grow but which might be fed to live stock; too high also for one to waste any corn land by planting seed that will not yield a crop. The dead corn ought to be fed to livestock, and the live, vigorous kernels ought to be planted.

Ten years ago the site of the town of St. Cloud, in Osceola county, was a turpentine camp. Its property this year has an assessed valuation of $1,445,000, and it is the home of a couple of thousand of good people. A new industry has just been established there to make palm fiber brooms. They cost a little more than from broom corn, but they last many times longer.

Prof. C. L. Willoughby of the State Experiment Station, urges war on the weeds, and either let them grow to destroy the crops or mow them down to go to waste. There is money in those weeds if sheep are kept on the farm. Sheep like the tender weeds and will keep them down. Of course if the sheep are turned onto the farm after the weeds have a rank growth and are tough they will eat the tender grass instead of the weeds. A community could almost be freed of weeds and a large amount of labor saved by the employment of a few head of sheep on each farm.

Dade County: In spite of the last two cold winters the citrus crops of this county was within 80 per cent of normal.

ST. CLOUD FLORIDA

ST. CLOUD TRIBUNE

Published Every Thursday by St. Cloud Tribune Company.

Entered as Second-class Mail Matter, April 28, 1910, at the Postoffice at St. Cloud, Florida, under the Act of Congress of March 3, 1879.

The Tribune is published every Thursday and mailed to any part of the United States, postage free, for $2.00 a year, $1.00 six months, or 50c three months—strictly in advance.

Reading notices in local column, 10c a line. Rates for display advertising furnished on application.

Advertising bills are payable on the first of each month. Parties not known to us will be required to pay in advance.

In sending in your subscription, always state whether renewal or new subscriber.

In changing your address be sure to give former address.

SUBSCRIPTION, PAYABLE IN ADVANCE, $2.00 A YEAR.

C. F. JOHNSON, Editor and Owner.

Most men are willing to serve their country in an official capacity.

The genius who invented the hairpin must have groaned when he thought of the centruries that had waited for him in vain.

Jacksonvill has reorganized their police department, making reductions in some places, and this just a week after the town had been voted dry.

—o—

The Germans are making another effort to break through the allied lines. They may bend them a bit, but the rebound of the allied line will play havoc with the Huns a little later.

—o—

There will be no hurricane striking the county court house for at least two more years from next January. The voters of this district averted this catastrophe when the re-nominated A. F. Bass last Tuesday.

—o—

Osceola County Commissioners have issued a new booklet telling some interesting things about the resources of the whole county. A copy may be had for the asking at the Tribune office. They are just what has been needed for some time to send to your friends in the North who are seeking information about this section.

—o—

When an old skate goes on a skate
and paws the very air,
And the voters take a hand and tell
their side of the affair,
The ice fails to form and the "skater"
tears his hair;
The threatened hurricane stalks back
into its lair.

—o—

Hereafter a civilian wearing a khaki suit of clothes will be much out of place, and will likely find himself in an embarrassing situation. The olive drab and khaki colored clothes have been declared the exclusive patterns for soldiers' uniforms, and civilians are warned not to use "camouflage."

—o—

Another step taken last week by the government in the interest of efficiency was the consolidation of all the express companies in the United States. One head will save great operating expenses by reducing the number of competing offices in large cities. The war is daily teaching us steps to take to become more efficient if it is costing millions to carry it on.

—o—

Jacksonville has a way of getting good things one after another. Now comes the official announcement that a concrete ship yard is to be established in the Gateway City by the government. One day's pay from the workers at one of Jacksonville's ship yards was recently donated to the Red Cross. The sum was over $5,000. This will give some idea of what a government ship yard means to a town.

—o—

Three more handsome brick business houses will be erected in St. Cloud in the next three weeks, showing that those who have been here since the beginning of the town have great faith in its future, regardless of the disasters the town has experienced in the past year. Capt. J. F. Farris and Dr. E. G. Farris are setting a good example for other owners of vacant lots in the business section in the work they are having done at the corner of Eleventh street and New York avenue.

—o—

Although an increase was granted to railroad employees all over the country under government control, there has been a howl sent up by some of them that they didn't get enough. The more a man gets the more he wants. We believe Uncle Sam can be depended on to give all that is coming in every case. If he owes you a penny he will spend several more pennies to get you paid, but if you owe Uncle Sam he'll get what is coming if it costs several times the amount to make you cough up.

—o—

GUESSAZ TO WORK IN AEROPLANE FACTORY IN OHIO.

L. A. Guessaz, who has served so efficiently on the Tribune staff for the past four years, left this morning for Paris, Ill., where he will visit with relatives for a few days before going to an Ohio town to accept employment in a factory manufacturing aeroplanes for Uncle Sam. Mr. Guessaz has been anxious to get into the government service ever since America went to war, but a crippled foot kept him out of the army and navy, but being determined to serve, and being also an expert machanist, he has resigned from the Tribune to go to the factory to work on government supplies as stated.

Mr. Guessaz formerly lived in Texas where the Guessaz family is well known in the publishing business, and many members of which family have been in the army in years gone by, several of them being with the colors today. His place here will be hard to fill in the same manner as he filled it and aside from the regrets of the Tribune at his departure, he leaves a host of friends here who will miss him, but who wish him great success in his new position.

Mr. Guessaz was accompanied by his son, Master Louis, who will spend the summer with relatives in Illinois.

FLORIDA SUBSCRIBED $758,224 TO RED X

PRACTICALLY EVERY TOWN HAS OVER-SUBSCRIBED

Statement From Headquarters Shows Quota and Subscription From Each Section.

Practically every Red Cross chapter which means every town and community in Florida, went "over the top" in the recent drive for funds for the Red Cross, according to a table which has been furnished the Tribune by Willis J. Milner, Jr., director of publicity for the Southern Division of the American Red Cross, and the headquarters of which is at Atlanta. The entire state contributed $58,224.

The statement of Mr. Milner follows:

Atlanta, Ga., May 30, 1918.

"We are enclosing a list of all of the chapters in your state which have gone "over the top" so far in the second war fund campaign. The returns from our chapters are not yet complete and we are hoping that by the time all the reports are in every chapter in the southern division will have over-subscribed its quota. At present 90 per cent of them have gone "over the top."

"Our latest report shows a total of $5,794,368 for the division, which is divided among the five states as follows:

Tennessee	$1,674,923
Georgia	1,206,413
North Carolina	1,131,484
South Carolina	1,023,322
Florida	758,224

"All of the states greatly exceeded their quotas, South Carolina and Tennessee having doubled theirs and the other three subscribed approximately 190 per cent.

Very truly yours,
"WILLIS J. MILLER, JR.,
"Director Bureau Publicity, Southern Division, A. R. C."

The Table.

PLEASED WITH KING'S LETTER.

Seattle, Wash., May 24, 1918.

Hon. W. G. King,
St. Cloud, Florida.

My Dear Sir and Brother:—Seeing your article in my St. Cloud Tribune of May 16th in reply to some one who claimed that the grand showing that St. Cloud made in the Liberty Bond drive was because it was a rich city, I could not refrain from writing a line to thank you for writing what you did. Yes, we know that the rich people have responded very liberally to the good cause, but if they had responded as liberally as the good, self-sacrificing, poor widows and our good old veterans who have to live and scrimp on the little pension that our government (and the best government in the world) grants them, then it would not be necessary to call for another loan, even though the war might last two years longer.

Your friend,
(General) Geo. W. Tibbets,
Past Dept. Commander, Wash. and Alaska.

AN OPERATION BY TELEGRAPH

An operation carried out under directions given by a surgeon 1,000 miles away and sent by telegraph saved a life in Australia recently. The subject fell from his horse at Hall's Creek in Northern Australia, and suffered serious injuries, including a rupture of the urethra. An operation was urgently necessary and there was no doctor within 1,000 miles. The condition of the patient was described by telegraph to a doctor in Perth and he sent back by the same means, instructions under which the postmaster at Hall's Creek, with such surgical instruments as he could get, the chief of which was a razor carried out the operation successfully.—Scientific American.

Human liberty is no longer the plaything of monarchs.

SAID ABOUT ST. CLOUD PEOPLE

COMMENTS FROM THE PAPERS THROUGHOUT THE COUNTRY

Judge S. D. Decker may be drafted into the political campaign, according to a well known anxious that Judge Decker make the announcement for judge of the Superior Court. It goes without saying that if Judge Decker enters the race that he will be among the leaders, for he is known to nearly every new voter in Creek county.

Besides his own popularity he enjoys the honor of being the father of Ex-County Judge Vic S. Decker, and there is no doubt but that all of Vic's friends would rally to the support of Judge S. D. Decker in case he allows his name to go on the official ballot. —Sapulpa (Okla.) American.

Short Sermons

The Tribune has arranged for a series of [illegible] sermons for the Stay-at-Home people [illegible] by the local ministers of St. Cloud.

HOW TO STUDY THE NEW TESTAMENT.

The entire Bible is ours, and it is important we know how to study it as a whole, but there are special reasons why we should understand the the New Testament. It is the constitution of the new covenant under which we live, and a full knowledge of the New Testament must be had for us to know what God wills for us to do. Much injury has resulted from a want of a clear-cut distinction between the Old and the New Testament.

Many religious teachers treat the two volumes as though they were identical in their teachings. They are as apt to send a penitent sinner to the Psalms of David, as to the Acts of the Apostles, to know what to do to be saved. And when we come to the New Testament we often find similar confusion. Some seem to think that the different parts of the book just happened to get into their present places; that Matthew might as well have been the last as the first, and that Revelation was not necessarily the last section of the volume. The idea in many cases seems to be that these different books of the new Testament found their several places, much as different tracts might find theirs when bound together by a publisher without reference to their contents; but such a conception is as far from the truth as the east is from the west. This book is as systematic in its arraignment as any text-book. Matthew is first because it should be first, and Revelation is last because it should be last.

Man, spiritually, is a four-fold creature, and this is four-fold in its divisions, each division meeting and supplying the spiritual wants in the order of their occurence. Each division has one great or fundamental purpose which gives character to them. It is true they each contain many other important things, but these are subordinate. The first spiritual want of the one studying Christianity relates to the Christ. An educated Hindu, with a clear head and good heart, having heard of the Christian religion, lands in New York for the purpose of investigating it. The first Sunday morning finds him listening to the Presbyterian preacher. When he analyzes the sermon he finds that the central thought is of a great person called by various names; Christ Jesus, Saviour, Lord, etc. At night he hears a Methodist preacher, whose sermon in many respects is different from the other, but both are identical so far as this central thought is concerned. He continues to hear eminent men for months, and they differ in a thousand minor details, but are a unit concerning the Christ. This Christ is to their theology what the sun is to the solar system—its center; the point around which all things else revolve, and from which they receive their light and life. He now selects a competent teacher and his studies begin in earnest.

This teacher, that this first want of his be supplied, directs him in a careful study of the first division of the New Testament, Matthew, Mark, Luke, and John. He has him witness the dove-like descent of the spirit and the audible voices from the sky. His pupil is deeply interested and asks for further instruction. He is next shown the Lord as he hushes the sea into silence. They now go to a desert place to see him feed five thousand on five loaves and two fishes. Before leaving this miracle let me say that it is one of the mightiest the Saviour ever wrought. It is easy to deceive the eye, the ear and the touch; but not so the appetite of a hungry man. He next arrests the attention of his pupil by reading of the raising of the widow's son, the raising of the daughter of Jarius, and the raising of Lazarus from the dead. Doubt now flies and the young man now joyfully proclaims "It is Enough; I believe in Jesus, as the Son of God, and the Saviour of men. Thus the first want of the spiritual nature—to know Jesus—is met and supplied by the first division of the New Testament—the Gospels. Many other signs truly did Jesus in the presence of his disciples which are not recorded in this book, but these are written that ye might believe, and that Jesus is the Christ, the Son of God; and that believing ye might have life through His name. It is popular in some circles to ignore the miracles altogether, to throw them out of court, as unworthy of consideration by this cultured age, But, before agreeing to this wholesale slaughter of Bible facts let it be remembered that the people among whom they were wrought did not deny them. They attempted to discount them by ascribing them to Beelzebub, the prince of devils. But it was a later age—much later—that discarded them altogether. Suppose a young man, after much research and profound thought, decides that the Battle of Gettysburg is a myth, no such conflict ever occurred; but when he closes his eloquent address an old, battle-scarred veteran of Picket's division, who lost an arm in that famous charge, says: "Young man, that was a fine speech, but it is false; there WAS such a battle, for it was there I lost my good right arm." Whom shall we believe? The man who was on the ground when the battle was fought, or the man who was born forty years later? But more important still, let it never be forgotten that when we give up miracles we give up Christianity. If there be no miracles then there was not incarnation, no resurrection, and no ascension, and without these there is no Christianity. Having found himself a sinner and having found the Saviour the second spiritual want voices itself in the question, "What must I do to be saved? Here is the salvation; how can I appropriate it? His teacher turns to the Book of Acts, the second division of the New Testament. Here he finds perhaps a half million people with the same want in their hearts, and this same question on their lips; and he finds that all of them heard the Gospel, believed it, repented of their sins and were baptized in the name of the Father, Son and Holy Ghost; and he, too, without quibble or delay, is buried in the symbolic grave, and rises to walk in newness of life.

The next two divisions will be treated in the next sermon, which will be one month from today.

(By I. L. Jenkins, Pastor Christian Church).

LIVINGSTON MISSION M. E. CHURCH

Last Thursday evening at 7:30, a large congregation assembled at the Livingston Mission M. E. church to observe the proclamation of President Wilson, calling the people to hold services of humiliation and prayer. The pastors and membership of several of the other churches were present and had a part in the exercises.

Prayer was made for the president and his advisrs; for the generals and admirals of the army and navy; for the men in the trenches and in the battle; for our Allies; for the mothers of our brave men who have gone to fight for us the battles of freedom and humanity; for the Red Cross and the Y. M. C. A. and all kindred organizations doing work for the welfase of our men; for our great people and our great country, that we may be united in heart and purpose, and that blessing and prosperity may attend us, that our fields may yield their abundance, and that we may fight to a successful issue the great battles before us.

It was a meeting long to be remembered, and a spirit of deep humility and profound faith and devotion pervaded the congregation, and was expressed in all the prayers.

The Epworth League held its regular social Friday night. It was a patriotic social. The annex was decorated with the National colors and the program was in accordance thereto. Watermelons furnished the refreshments. A large number of the young people enjoyed the fine time. The Epworth League holds these socials regularly and they are a strong factor among the young people.

Sunday was a good day at this institution. Seven were received into the church at the morning services. Mrs. E. Vanleuben came to us by transfer from Spring Valley, Minn; Mr. F. M. Mank came by transfer from Lima, O.; Mrs. Katherine Mank came from the Reformed, and Mr. Geo. H. Steele from the United Brethren church. Mr. Albert Whitehead and Mrs. Sarah Jane Whitehead came to St. Cloud last fall for his health, and liked here so much that he has built a home on Illinois avenue and Seventh street. He never had been converted, but made a start a week ago and was converted at home Tuesday night, May 28, and has come into the church. Thus St. Cloud becomes good for him, body and soul, and this church is playing its part in helping him in the spiritual life. Mr. Adam McGill was received into the church from Preparatory membership. Mr. McGill was converted last fall, and has now come into the church for the remainder of his days. Thus Sunday was a day of splendid victory, and a substantial increase in membership. May the Lord graciously add unto us many more of such as shall be saved.

Sunday night the subject was the eclipse. There will be a Junior Epworth League social Saturday in honor of the occasion.

The pastor and family are in DeLand this week attending the commencement exercises of the John B. Stetson University. Miss Olga Bowen matriculates from the college of Liberal Arts. She will make St. Cloud her home for the most of the summer and will return to Stetson for a post graduate course, and will study for a Master Degree next year.

Rev. August Peter had charge of the prayer meeting Wednesday evening in the absence of the pastor.

SOME LIBERTY LOAN PURCHASES

It is estimated that the Americans of foreign birth or extraction purchased $350,000,000 of the Third Liberty Loan; the number of such bond buyers is estimated at over 5,000,000.

A consular telegram from Shanghai, China, states that subscriptions to the Third Liberty Loan in Shanghai has amounted to over $600,000.

The American embassy in Mexico City states that the subscriptions in that city are more than $384,000, more than double the quota set for the Americans living there.

The Shah of Persia purchased a $100,000 Liberty bond.

REMOVAL NOTICE!

I have moved the Padgett Market fixtures from the old location on New York Avenue to the Perry building, just back of the post office, where I will continue to serve my patrons with fresh and salt meats.

Call and get your meat supplies

TOTAL SOLAR ECLIPSE TO BE SEEN JUNE 8

PART OF FLORIDA IS IN AREA OF TOTALITY

In Tampa It Will Be Only Partial—Will Be Late In the Afternoon

Astronomers and scientists all over the country are greatly interested in the total solar eclipse which will take place June 8, next Saturday, and the general public also is interested. While the astronomers will watch the phenomenon through big telescopes and will endeavor to take photographs of the sun's corona, the general public will watch through smoked glasses. While the eclipse will be visible over a large part of the United States as a partial eclipse the line of totality is comparatively narrow, being 66 miles wide at Aberdeen, Wash, and 40 miles wide at Orlando, Florida. The narrow strip of totality stretches across the United States in a straight line between the two points, embracing such cities as Baker City, Ore., Green River, Wyo., Denver, Col., Garden City, Kan., Guthrie, Okla., Yazoo City, Miss., Leesburg and Orlando, Florida. It will begin early in the afternoon on the Pacific coast, while at Orlando the period of totality will begin at 5:41 p. m.. Tampa will be outside of the area of totality, and in this city the eclipse will be visible as a partial eclipse only.

The following interesting article on this eclipse is by Dr. C. S. Brainin and appears in the current issue of the Monthly Evening Sky Map, published in New York City.

Our Total Solar Eclipse, June 8.

(By Dr. C. S. Brainan.)

Fortunately, indeed, is the man to whose very doorstep Dame Nature brings her most marvelous spectacle—a total eclipse of the sun. The map which is published this month shows the long, but narrow, strip of country which will be thus highly favored. The heavy central line shows the best locations for observation, but totality will be observed everywhere within the outer lines. Outside of this section the eclipse can be seen as a partial throughout the United States, but in no way can the two phenomena be compared. What you see as a total eclipse can be seen only when the totality is complete. Under exceptional atmospheric conditions this statement can be somewhat modified, but we dare not hope for it here. For that reason all who can make the pilgrimage should get as near the central line as possible, and our map shows a great many towns well situated for the observations. You do not need to be the possessor of a telescope as the unaided eye is entirely sufficient. A smoked or dark glass will be of advantage in watching the progress of the eclipse in its preliminary partial phase, but should be discarded as the totality arrives. The latter will last not quite two minutes at the western end of the line and only three-quarters of a minute in Florida. This makes the western portion of the path better suited for observation. Three other important reasons contribute to its superiority: the greater likelihood of a clear sky—for clouds would mask the entire phenomena and make the trip fruitless; the pleasanter climatic conditions, and the fact that at the time of the eclipse the sun will be higher in the sky, as seen from western points. This latter point can be realized by referring to the figures for the beginning of totality given on the map.

Solar Eclipses in History.

All the early chronicles contain notes of the eclipses and attempts to connect them with important events of the time. We may mention here two of the most interesting stories found in the annals. The Chinese have the great credit of possessing the very first record of a solar eclipse, which occurred back in 2136 B. C. It appears in the writings that the two astronomers royal failed to prophesy this eclipse and to go through the proper ceremonies for warding off the evil which might ensue therefrom. To appease the wrath of the powers above the emperor at once took the necessary and proper measure. He executed the astronomers. Another eclipse, that of 585 B. C., was foretold by the great Greek astronomer, Thales of Miletus, and thus probably was the first one prophesied by a European. This eclipse had the good effect of making peace between the Medes and the Lydians, who had been engaged in a war for several years. The eclipse took place in the midst of a hotly contested battle and scared both sides into a cessation of hostilities. These records of eclipses are of great importance to the modern historian, for with the help of the astronomer he is able to settle more or less definitely a great many dates in ancient history which would otherwise remain unknown.

Cause of a Solar Eclipse.

Seen from the earth, sun and moon appear of the same size very nearly, so that the moon can cover the disk of the sun. This is true only for observers situated in the part of the earth touched by the shadow of the moon. Outside of this restricted area is a larger area, where the eclipse appears as a partial eclipse, gradually diminishing in degree from the shadow path onward. Sometimes the moon is so from the earth that the point of the moon's conical shadow does not reach the earth at all, and then we cannot have a total eclipse at any point on the surface of the earth. At the time of a solar eclipse the phase of the moon is "new," but we do not have an eclipse at every "new" moon because the earth, moon and sun are not all in the same plane. At most new moons the shadow of the moon passes above or below the earth and no eclipse is observed.

Phenomena of the Eclipse

The moon is, of course, quite close to the sun just before the beginning of the eclipse, but naturally is invisible to us. Suddenly we find that a little dent has been made in the sun's previously perfect edge. Very slowly the dark area increases as the moon progresses eastward in its course. So far nothing about us seems changed; the day is as bright as ever. Half of the sun becomes covered and still we are in broad daylight. But the moon steadily continues to decrease the sun's brilliant surface, and when only a slight crescent remains we notice that darkness is really gathering. If we are located near a leafy tree we will find that its shadow is interspersed with small crescents of light, which are images of the sun produced by the small openings amongst the branches and leaves, a pin-hole camera effect. As the crescent dwindles to a thin line of light the darkness becomes more marked. In the instant that the sun is entirely obliterated the darkness is like deep twilight and through a psychological effect decidedly uncanny. Then there flash into view around the back disc of the moon rose-red prominences which shoot out from the sun thousands of miles into space; around the entire sun play the pale halo and the streamers of the solar corona. In the absence of the direct sunlight the neighboring first magnitude stars and planets become visible. We shall probably see Aldebaran, Sirius, the Twins and the Orion stars, as well as the planets Jupiter and Mercury, the latter of which is always close to the sun. We can tell of this wonderful sight, but can not describe it adequately. Go and see for yourself. As we stand gazing in silence the moon moves steadily inward, and presently uncovers the western limb of the sun. A beam of direct sunlight strikes the earth and immediately the vision of beauty vanishes. The eclipse returns once more to the partial phase, bringing the day back with it, but the image of the solar glory remains with us forever.

Eclipse Notes.

The solar eclipse of June 8, 1918, begins at sunrise at Borodino islands, south of Japan, and is visible as a partial eclipse in southeastern Asia, in the Arctic and North Pacific oceans and throughout North America. Passes diagonally southeast through the United States and ends at sunset at the Bahama Islands.

The last solar eclipse visible in the United States was in 1900, and there will not be another until 1923.

The moon in her motion eastward overtakes the sun, consequently an eclipse of the sun always begins on the west side of the solar disc.

The width of the shadow path is 66 miles at Aberdeen, Wash., and gradually narrows down to forty miles at Orlando, Florida.

The duration of totality at Aberdeen is two minutes, and at Orlando, Florida, forty-five seconds.

The time required for the shadow to sweep across the United States is 46 minutes.

COMING VISITING GOING

ST. CLOUDLETS

LOCAL PERSONAL SOCIAL

You can pay county or city taxes at A. E. Drought's office. 20-tf

John Andrist left this morning for a few months visit in Alliance, O.

Van Rickets left on Thursday for Victory, Ohio, to spend the summer.

Mrs. J. D. Woodbeck, of Kissimmee, was a visitor at St. Cloud on Wednesday.

Miss Kathleen Riggan is visiting friends at Port Orange for a few weeks.

Mr. and Mrs. C. H. Ricketts and family left on Thursday for Cincinnati, Ohio.

Mrs. M. M. Reynolds left Saturday for a few days visit with her husband at Arcadia.

Mrs. Elizabeth Truedell will leave this morning for a summer's visit with friends in Montana.

Mr. Jake Stevenson left on Sunday for Tampa, where he is employed in the steel ship yards.

Rev. H. H. Bowen and family left on Monday for DeLand to attend the commencement exercises.

FIRE—Is your home insured, if not why not? See W. G. King. 20tf

Mrs. M. M. Reynolds left on Saturday for a few days visit with her husband at Arcadia, Florida.

Mrs. Marskie left on Thursday to spend the summer with friends and relatives at Janesville, Wis.

Orlando's famous ice cream at Angels.

Mr. Sage recently moved his family from the Marsh apartments, on Florida avenue, to Ohio avenue.

Mrs. Elizabeth Truedell left on Thursday for Wagner, Mont., but will stop off for a short time at St. Paul, Minn.

Mac Arrowsmith, who is employed in Tampa, spent the week end here with his parents, Mr. and Mrs. Geo. Arrowsmith.

Mrs. Dr. Johnson, of Lake Alfred, who has been visiting her cousin, Mrs. A. B. Daniels, returned to her home on Tuesday.

Mr. and Mrs. Coyle and daughter, Florence, left Wednesday morning for a few months' visit at their old home in Covington, Ky.

Mrs. Florence Deschner left this morning to visit her children who reside in Vinton, Iowa. She will be gone for several months.

Mrs. L. U. Zimmerman and little Francis Conn returned Tuesday evening, after attending the graduating exercises at DeLand.

Comrade Farnum will leave Friday morning for Chicago for a few months visit. His many friends hope to see him back in the fall.

Comrade T. F. Van Arsdale and his wife returned Wednesday evening from Johnston City, Tenn., after a few months' sojourn at the home.

Dr. O. L. Buckmaster left on Wednesday morning to accompany Mr. W. S. Freeman to St Louis, where he will enter the hospital for treatment.

Minerva B. Cushman, M. D., D. O., Homeopath. Phone 38. 24tf

Miss Bonnie Ricketts, who is training for a nurse in a hospital in Tampa, spent the week end here with her parents, Mr. and Mrs. C. H. Ricketts.

Comrade G. M. Davis left this morning for Brooksville, Ind., where he will spend the summer months with his daughter, expecting to return in the fall.

Mr. and Mrs. W. R. Helms left this morning for several months visit in Michigan and other states. Their many friends will be glad to welcome them back.

The most complete line of cigars in the city at Angel's.

Mr. Williams, who had been at the soldiers home for some time, accompanied by his wife, Nurse Williams, returned home. All glad to get home again.

Mr. and Mrs. G. F. Smith left this morning for their old home in Vinton, Iowa, for the summer months, hoping the change will be beneficial to Mr. Smith's halth.

Philip Emory, who has been employed by Mr. Morgan, who keeps the Model Dairy, will take a vecation and will start Saturday night for Boston to visit a brother.

Mr. Earl Mallory and mother, Mrs. R. E. Mallory, left Wednesday for their old home, Syracuse, Ohio, where Mrs. Mallory will spend the summer, but Mr. Mallory will return soon.

Wiley's Delicious Atlanta Candies at Angel's.

Mr. and Mrs. Paschal Strode left on Monday for Green Cove Springs, Fla., and will stop at Atlanta, Ga., to visit Mr. and Mrs. James Marsh before returning to their old home at Massillon, Ohio.

Professor Bullard, of Florida avenue, with his wife and little son, Hudson, expect to start Thursday for their home near Macon, Ga. Hudson is a bright little lad and will be greatly missed by his neighbors.

S. W. Porter, real estate, insurance.

Mr. and Mrs. A. U. Cooley spent Tuesday in Kissimmee.

Mr. C. Woodmansee and niece, Miss Hoffman, went to Winter Haven last Saturday for a short visit.

Mrs. J. W. Whitbeck and son, Clarence Williams, left on Tuesday for their old home in Michigan.

Mrs. P. D. Outlaw left on Wednesday morning to spend a week with her children in Kissimmee.

Mr. and Mrs. G. F. Smith and Mrs. [illegible] left this morning to spend the summer at their old home at Vinton, Ia.

Mr. and Mrs. O. C. Knight and baby Billie, left on Wednesday for a week or ten days visit with Mr. Knight's parents, Mr. and Mrs. O. C. Knight, at Mascot, Fla.

Donald Conn, who graduated from the Stetson University at DeLand, went to Jacksonville and enlisted and is now at DeLand waiting the call from Uncle Sam.

Mr. and Mrs. W. H. Stafford and Mrs. Stafford's brother, James Boyd, left on Tuesday for Humphry, Kansas, where they expect to make their future home.

Mrs. Frances Glenn left this morning for East Moline Ill, to visit her sister, whom she has not seen for many years. Mrs. Glenn expects to return in the fall.

A farewell party to Mr. Van Ricketts was given Wednesday evening at the Lake Shore Club, Mr. Ricketts leaving this morning for Ohio. After a dip in the lake marshmellows were toasted over a camp fire.

Comrade E. Holden has charge of Comrade J. Parkhurst's place on Ohio avenue during his absence at Louisa, Va. He recently discovered a volunteer potato plant that contained 21 eatable spuds growing in the Parkhurst garden.

It is rumored that Mr. George Clark and Miss Cora Anderson were quietly married some months ago. Not even their nearest friends learned of it until recently. They have the kindest wish es of a host of friends.

Mrs. J. H. Johnson and baby Edward, left on Wednesday to spend the summer with her parents, Mr. and Mrs. McLaughlin, at Hendersonville, N. C. Mr. Johnson accompanied his wife and baby as far as Kissimmee.

Mr. and Mrs. William H. Bailey, of Kentucky avenue, left this morning for a summer visit with relatives in Jamaica Plains, Mass. Their many friends will be glad to welcome them home when the cold winds begin to blow.

Last Sunday Mr. and Mrs. Oliver Rothrock and children, of near Bartow motored to this place, surprising father and mother P. Rothrock, of Pennsylvania avenue, in fact the latter did not recognize her chiluren when they first greeted her.

Mrs. R. E. Slawson left on Wednesday to spend the summer with her daughter, Mrs. Boggs, at Waverly, Kansas, her son-in-law Dr. Boggs, being in the Medical Reserve Corps and is now on his way to France. Mrs. Slawson expects to return here in the fall.

A surprise party was given at the home of Miss Rita Bowen on Ohio avenue, in honor of Mr. Irvin Bowen and Miss Rita Bowen last Tuesday evening. The evening was spent very pleasantly playing games. During the party punch and sandwiches were served and the guests enjoyed a watermelon feast.

The neighbors were both surprised and pleased with the return of the Van Arsdales, of Ohio avenue, on Memorial Day. Two months ago they went to Johnston City, Tennessee, for the benefit of their health, but the lure of St. Cloud and home brought them back before the summer was over.

Comrade William A. Ricketts and wife left this morning for Bellefontain, Ohio, for a three months visit with their daughter; Comrade Ricketts is a booster for St. Cloud, supplying himself with literature from the Tribune office, as he hopes to bring others with him when he returns in the fall.

Dr. and Mrs. O. L. Buckmaster and little daughter, Roberta, left Wednesday morning for St. Louis, Mo., where they will be the guests of relatives for several weeks. Dr. Buckmaster intends to return after a short visit while Mrs. Buckmaster and daughter will visit in Kentucky before returning to their home in St. Cloud in September.

Many a man who seems perfectly happy is wearing a shirt made by his wife.

Desirable Cottages and Rooms For Summer Rental

A four-room cottage, on lake front, for summer rental $12.00.

One two or three rooms furnishsd, in beautiful lake front home, special rate for summer only.

APPLY TO

A. E. BARDWELL
LAKE FRONT

Mrs. N. H. Shields left this morning to visit her sisters in Southern Illinois and Southern Indiana.

Try a pound of Angel's Delight Coffee next time.

Jake Reifschneider returned to the city Wednesday, after a visit to several states in the west.

Mr. and Mrs. M. W. Lawton left this morning for Fulton, N. Y., where they will spend the summer.

Comrade John Scott, of Redmond, Ore., arrived in the city yesterday morning and is the guest of his old friend Comrade Z. T. McClay.

Gehue Rowland continues to supply the largest part of St. Cloud with the choicest fresh and smoked meats from his New York market. Prices will at all times be as reasonable as quality will permit. Cleanest and best market in St. Cloud.

I. E. Firkin purchased the grocery [illegible] M. W. Lawton last Friday and has moved to the Firkin building in which is also located the New York meat market operated by Mr. Gehue Rowland. Mr. Firkin will continue to serve the public with an up-to-date stock of groceries.

Friends of Mrs. Grace Cooper, who left this city for Boston last week will be glad to learn that the steamer on which she left Savannah, has arrived safely at a port on the Atlantic, and successfully evaded the Huns sub-marines, that attacked several other ships during the past week.

The Priscilla Club met on Friday afternoon, May 31st, with Mrs. William Barber at the New England After a short business session, the time was pleasantly spent in snipping rags for Red Cross pillows and in making scrap books for the soldiers. The next meeting will be held in two weeks at the home of Miss Ella McAllister, on Carolina avenue and Eleventh street.

RED CROSS DRIVE'S OVER-SUBSCRIPTION TO TOTAL 70 MILLION

DAVIDSON CONGRATULATES THE AMERICAN PEOPLE ON FINE SHOWING

Gulf District Gave Three Times the Amount of Its Quota, Repart Shows

The American Red Cross' second war mercy fund totals $166,439,291, with indications that when all reports from the drive of a week ago are tabulated a $70,000,000 over-subscription of the $100,000,000 goal will be shown. In announcing the figures tonight, Henry P. Davidson, chairman of the Red Cross war council, said returns show that more than 47,000,000 Americans—nearly half the population of the country—contributed. Those giving to the first fund last year numbered only about 5,000,000.

Not only did every Red Cross division in the country over-subscribe, but one, the Gulf, turned in more than three times the amount of its quota, while five others, the Southern, Atlantic, Mountain, Northwestern and the Southwestern, more than doubled their allotments. The insular and foreign division quadrupled its $300,000 quota. Every state attained its goal, five more than tripled it and sixteen others and the District of Colmubia more than doubled theirs.

"The supreme feature of the achievement," said Mr. Davidson's statement, "is to be found not in the amount of money subscribed, but in that it came from every part of the United States, its towns, its farms, its factories, from the rich and the poor, regardless of sect, color or political creed.

"No American wants thanks because his country has so richly fulfilled her obligation, but I do congratulate every American who has either contributed time or money towards this, the greatest work of mercy, pity and love in the history of mankind." The quotas and subscriptions by divisions announced include the following:

Division.	Quota	Subscription
Southern	$ 2,950,000	$ 5,904,000
Gulf	1,300,000	4,133,769
Southwestern	7,250,000	13,504,498
Greater New York	25,000,000	33,455,764
New England	6,650,000	11,100,000
Northern	2,200,000	4,217,029
Pennsylania	12,000,000	18,100,000
Ins. and Foreign	300,000	1,200,000

The states tripling their quotas were Alabama, Mississippi, South Carolina, Wyoming and Arizona; and those more than doubling their allotment were Louisiana, Tennessee, Texas, New Jersey, Connecticut, Michigan, Nebraska, Colorado, New Mexico, New Hampshire, North Dakota, Washington, Idaho, Delaware, West Virginia and Kansas. Alaska turned in more than four times its $20,000 quota.

GREAT WAR LOANS

The following are the greatest war loans made by various belligerent nations:

British victory loan in 1917, 5 per cent. Total subscriptions, $5,096,245,320.

United States Second Liberty Loan, 4 per cent. Total subscriptions, $4,616,000,000.

Eighth German war loan, 4½ per cent and 5 per cent. Total subscriptions, $3,600,000,000.

French war loan of 1915, 5 per cent, Total subscriptions, $2,261,864,409.

Austrian seventh war loan, 5 per cent. Total subscriptions, $1,150,000,000.

Italian fourth war oan, 5 per cent, Total subscriptions, $1,000,000,000.

Hungary seventh war loan, 6 per cent. Total subscriptions, $600,000,000.

Canadian victory loan, November, 1917, 5½ per cent. Total subscriptions, $418,000,000.

Wealthy Mail Clerk

Mrs. Finley J. Shepard is one of 11 women volunteers daily handling the mail for jackies at the Brooklyn Y. M. C. A.

VETS ASSOCIATION

The Veterans' Association met at 2 p. m., Saturday, June 1st, 1918, with President Kenney in the chair and was opened in usual way. Song, "America." J. B. Westcott offered prayer. Second song, "Song of a Thousand Years." The president gave notice of the articles lost and found, also mentioned the great pleasure of the soldiers upon receiving nice things from home and friends, from sweethearts especially. Get the nice presents all ready and send them across the sea, but don't send anything that is not useful, as notice has come to everybody to only send such things as have been asked for by the men and boys over the sea, as other things will not be sent by the post office department.

Some reverend gentleman some time shortly will preach in the hall on the "Terrible War." Notice will be given. There will be a sale of real good things at the Pifer House as soon as this meeting closes, everybody invited to attend. There will be some of the candidates on this platform to tell the people how they stand on the various questions of the day—questions that should very deeply interest all the tax payers. Mr. Sid Porter and Mr. Triplett came to the platform and explained the situation very nicely and plainly.

President Kenney spoke of people who had an overabundance of self-conceit and of those who were well supplied with self-esteem, and noted the vast difference between the two elemnts of charactr. The President also urged that we all do all in our power to help win the war. Dr. Silas Cooke made a short but excellent address on the important issues of the present time.

The meeting closed by all joining in and singing The Star Spangled Banner.

WM. P. LYNCH, Sec.

RED CROSS NOTES

Furnished by the St. Cloud Red Cross Chapter.

The Prussian must be punished and
Von Hindenburg be beat;
We can't allow old Kaiser Bill to keep
his lofty seat.
Our boys have got a man's job, both
for days of chill and heat.
We must send them cheer and comfort
so they'll never get "cold feet."
So get your needles busy, making socks
both stout and neat,
For we want to see our Sammies go
marching down a Berlin street.

THE RED CROSS WORK IS GOING ON.

Uniforms of long white aprons and veils, have taken possession of the New St. Cloud Hotels, by the kind permission of the proprietors and the dining room is converted into an up to date surgical dressing work room.

A class of enthusiastic women are taking instruction in the act of making the dressings so much needed-we can't let our American boys need any attention within our power to supply!

While the needles are swinging
World across march singing.
True banners of freedom
Right soon may they wave
O'er all lands of the free
And all homes of the brave.

With the approved surgical work Rooms and the corps of competent instructors this class will become, St. Cloud will take her place among progressive Florida towns and will be given her allotted number of surgical—dressing each month from Division Headquarters.

Here's a verse that would please our limerick loving president; it comes from "C. K. H.," Mendham, N. J.:

There are some young persons in Mendham
Who knit soldiers' socks and they send 'tm
So the soldiers can run
Hot foot on the Hun
And at point of the bayonet end 'em.

The Monthly Red Cross Business meeting will be held Friday afternoon at 2:30. Each chairman and supervisor is expected to make a written report of the months' Work. All interested in the Red Cross Work are invited to attend.

The toe is very easy, as most all people think,
But the first pair that I knitted were surely on the blink.
One toe was square and funny, as funny as could be,
I was told I should have sent it right over to Germany.

There will be a box of knitted garments sent to the Jacksonville warehouse next week. Please bring in all finished socks and sweaters as soon as completed, also any left over yarn.

Do not begin a new garment for the next yarn may be different and what you have left may help some one to finished her socks or sweaters.

Banners are waving, people are saying,
Airships are up in the air.
Our needles are flying, while everyone's crying,
"Hurrah for the boys over there."
Cheering is fine, but give me for mine
Some needles and yarn and the chance,
You can bet I will stay at my task all day,
Of knitting for the boys in France.

Socks Again.

Still they are coming in—hundreds of them— and so many have to be reknitted. In future follow the directions given below in knitting them:

The foot should measure 11 to 12 inches from the back of the heel to the end of the toe. The foot should be about four inches across at the instep. The leg should be about 14 inches long from the bottom of the heel to the top of the sock.

In casting on the stitches do not pay so much attention to the number of stitches as to the size. The sock should measure about four inches wide across the leg.

It is absolutely imperative that the socks be free from knots inside—the soldiers cannot wear them unless they are.

If you have not already received directions for making the Kitchener toe, come to the Red Cross rooms and receive a copy of the directions.

Sing a song of sox points,
A pocket full of yarn,
Several thousand stitches,
To save yuor feet from harm.
When the fight is over,
And Kaiser's on the run,
These sox will make it easer
For you to catch the Hun.

Although the afternoons of this week have been warm, the women are sewing on the hospital garments. The material on hand is gray outing, which is being converted into pajamas. A letter from Mrs. Cummer suggests that "In making these pajamas, do not [illegible] trimmings. A letter from Mrs. Cummer can be given to give them a finished appearance, especially if you are so fortunate as to have the dark colored outing flannel, as the men wear these pajamas as convalescent suits on the outside of the hospitals and I know they appreciate neat, well finished work."

A MOTHER KNITS

Heel and toe, and away we go
To crush into nothing the foe, the foe.
March with a will and last till the day
When my dear soldier lad comes back
from the fray.

Knitting the stitches deep into my
brain,
Thoughts come, so many (two purl and
two plain)
How can I wait till I see him again?
Be a knitter, not a knocker.

Anybody desiring to take sewing home may do so. One garment might be made at the rooms under the direction of the supervisor in order to guard against making mistakes.

Soldier boys, soldier boys, will you
tell us true,
Are the socks we knit at home fit to
offer you?
Do they keep your poor feet warm in
the trenche's mire,
Can you stand and fight in them
through the Huns' hot fire?

As you pass through No Man's Land,
on that strip of death,
O'er the top with winged feet climb
with gasping breath,
May the touch of home-knit socks
prove a magic charm,
Shielding you in time of stress, guarding you from harm!

Mrs. Jno. W. Grant, director of women's work for the southern division, of the American Red Cross, has sent Mrs. Jas. Laughlin, of Orlando, to instruct the class in surgical dressings in St. Cloud. The class began their lessons on Tuesday. Through the kind interest in the work by Mr. Voorheis and the generousness of Mr. A. E. Donegan, the class is privileged to meet in the dining room of the St. Cloud Hotel, where a daily lesson from 9 to 12 is given. Mrs. Laughlin is a pleasing and capable instructor and inspires her class with confidence and enthusiasm. The great pity is there are not more of our young women and girls willing to take up this greatly needed work, that should come before all our local duties. What is the training of a choir, a Sunday School class, a social society, or any other usual duty, compared to the making of these surgical dressings that are being sent so rapidly now to the relief and aid of our dear boys "over there?"

Brave soldier lad, on the firing line,
I'm knitting you socks of gray,
As I've no sons to fight with you,
I'm doing my bit this way.

When you come home with honors won
And tell of your part in the fray,
I shall try to feel you've been helped
along,
By wearing my socks of gray.

SOLDIER AND SAILOR INSURANCE

In all of our war measures and activities there is nothing wiser and better and frought with more good to our fighting men and the nation than our soldier and sailor insurance.

That the members of the military and naval forces of the United States for whose benefit the insurance was established, are availing themselves of it is something that all good Americans will rejoice at.

More than 2,000,000 members of America's fighting forces are now insured by the government for more than sixteen and a half billion dollars by the United States government. Up to the close of business Monday night, May 12, 2,029,886 insurance applications aggregating $16,663,514,000, had been received by the Military and Naval Division of the Bureau of War Risk Insurance. The average amount of insurance applied for is $8,209, the maximum permitted by law being $10,000.

Approximbately 11,000 applications for government insurance are being received daily. In the last two weeks $1,000,000,000 of insurance was written on the lives of soldiers and sailors. This indicates that the new men joining the colors are taking out government insurance.

Men are being urged to insure immediately upon enlistment, inasmuch as application must be made within 120 days after joining the service.

Lakeshore Cottages FOR RENT

Most desirable location for persons desiring cottage immediately, located on lake front, beautiful lawns, commodious buildings. Enquire of

E. A. BARDWELL
St. Cloud, Fla.

LEAGUE SOCIOL

A patriotic social was given by the Epworth League last Friday evening in the Annex of the Methodist church in honor of the Leaguers who have joined the colors, who are Otto Bleech, Frances Franch, George Jeffers, Dan Arnastrong, Harry Johnson, Milford George, James McPherson, Clifford McAfee and James M. Huffman. The Annex was attractively decorated with flags. Seated on a chair at a table was a doll dressed as a Red Cross nurse, who was industriously knitting, using toothpicks for needles. On the same table was a small prison decorated with the flags of the Allies. In this the Kaiser was imprisoned. Letters were written to all of the Leaguers in Uncle Sam's service, telling the news of the town. These letters were signed by all of the Leoguers. During the evening Misses Goldie Grove and Kathleen Goff gave readings. War games and contests were enjoyed. Watermelon was served. Quite a number of boys and girls were present, also a number of the older women leaguers.

CHRISTIAN CHURCH NEWS

Owing to so much on hand last week the children's day exercises were postpaned until next Sunday night, at which time we hope to have excellent exercises. Come and hear and see the children perform their parts.

The morning service will be as usual. The subject, "What Is the Difference Between a Christian and a Worldly Person?" This is an important subject and all should hear this difference explained. Come.

At the close of the evening service there will be an offering taken for the Foreign Missions. Come and help in this worthy cause.

The pastor was taken sick Monday afternoon but is better at the present writing.

MRS. NIGHSWONGER DIES.

Madge L. Nighswonger was born in Jacksonville, Ill., Jan. 21, 1867, a daughter of C. C. and Lydia M. Cox, of St. Cloud. Having lost her mother at a tender age she early dedicated her life to the Master's cause. She was married to Willis F. Nighswonger in 1885. In recent months she had been a patient sufferer and died after an operation, Monday, June 3 at the Gordon Kellar Hospital, at Tampa. Funeral services were held at the undertaking parlors in Tampa, where the minister spoke of her loving and helpful service in the church and how much she would be missed. The remains were brought to St. Cloud Tuesday evening and taken to the Carlson Undertaking parlors, and funeral services were held on Wednesday morning at 9:00 o'clock at the Methodist church, Rev. J. B. Westcott officiating. The burial took place at Mt. Peace cemetery.

The deceased leaves to mourn her death a father, Major C. C. Cox, three children, Earl Nighswonger, of Tampa, Lydias Nighswonger of St. Cloud, and Ernest Nighswonger, of Montana; two sisters, Mrs. Minnie Sellers of Tampa, Mrs. Alice McGill, of St. Cloud, and four brothers William M. Cox, of Kansas, Lydias Cox, of Iowa, Harry Cox of Canada and Ludwig Cox, who is in the army. The family have the deepest sympathy of this whole community, in which Mrs. Nighswonger lived for several years.

DAVID OSBORNE.

David Osborne was born at Pomeroy, O., November 12, 1846, and died at St. Cloud May 28, 1918, at the age of 72 years six months and 18 days. He was a soldier in the civil war serving about three years. The funeral services were held at the First Christian church at 10 a. m., Friday, May 31. He was a member of the Christian church for many years. The sermon was preached by Rev. I. L. Jenkins, pastor.

OUR NATIONAL PROBLEM

Our problem, says the Federal Reserve Board, is to convert less essential into more essential credit and to convert less essential to more essential goods. The saving of credit and money goes hand in hand with the saving of labor and materials in the program of adjusting the business of the Nation to a war basis. Our best hope of avoiding competition between the government and its citizens for credit, money, labor, and materials, which can only result in credit and price inflation and higher costs of living, is saving.

COUNTY AGENTS' REPORT

Hillsboro County: One day in the Red Cross drive was known as Farmers' Day and farmers coming to town brought products which were sold for the benefit of the Red Cross.

Levy County: One farmer in the Morriston neighborhood makes a specialtiy of raising hogs. He sold more than $2,500 worth of hogs last season.

Bay County: All crops are doing nicely and herds of livestock are free from disease.

Brevard County: Peas and beans are being planted extensively. This means not only soil improvement, but a lot of the best forage that can be produced for livestock available later in the summer.

Jefferson County: One plantation is now stocked with more than 300 Hampshire pigs, all subject to registry. The owners propose to treat all pigs at ten weeks old with double inoculation, and then to segregate them in quarantine for three weeks. Recent rains have improved the crop outlook 25 per cent.

Franklin County: Dipping vat construction has begun in the county. Two vats near the two principal herds will soon be completed, which will accommodate at least six hundred head. Other vats will be built as soon as funds become available.

Dade County: One canning factory near Miami canned 455,000 cans of tomatoes this season. Of this number 96,000 cans went to the American army in France. There are five canning factories in the county. Two years ago all ripe tomatoes were wasted.

Broward County: One company has shipped 1,00 barrels of 450 pounds capacity each of tomato paste to the North. Ripe tomatoes formerly allowed to rot in the field were utilized in making the product. Farmers received 45 cents a bushel for the ripe tomatoes, which meant several thousand dollars to them.

Jackson County: A number of farmers will plant some wheat this fall in an effort to conserve wheat by growing enough for their own flour-making purposes.

Hamilton County: Wheat grown in a few demonstration plots has made a favorable showing. The acreage of cotton is still being reduced.

Hernando County: Farmers are doing what they can to make the county self-sustaining. Nearly every acre in the county that is available for growing crops is under cultivation.

Lake County: The first watermelons quality. Castor beans are making a have been marketed, and are of good favorable showing.

Calhoun County: One farmer has 4 acres of wheat ready for harvest from which he will obtain a yield of twenty-five bushels per acre.

Clay County: Arrangements have been made for the boys' camp and short course this summer. The plan is to hold a week's course with lectures in the mornings; the afternoons will be given to sports, such as swimming, fishing and boating.

Suwannee County: There are more crops of oats, rye and peanuts to be looked after than ever before. Where the fields are stumpy and the one-mule plow system of farming prevails, the owners are facing a serious labor shortage. They can not use large implements to handle the crops.

Volusia County: The county board, the city council of Deland and the women's club working together rented a building large enough for offices for the county agent, the home demonstration agent, a rest room for those coming in from the country, and a demonstration kitchen.

Walton County: Since the last heavy rains about thirty per cent of the cotton acreage has been plowed up and planted to food crops.

Alachua County: Boll weevils are plentiful in all cotton fields inspected. A boys' club with ten members has been organized at Newberry. An up-to-date canning factory is at work at Micanopy.

OUR GRANDFATHERS drenched horses for colic. That was the old way which was uncertain and unsafe. Farris' Colic Remedy does away with drenching—is applied on the horse' tongue with a dropper which comes packed in each bottle. Get it today. We guarantee it.—H. C. Hartley. june

THE FARMERS BOUGHT BONDS

Next to the aggregate number of subscribers perhaps the most striking feature of the Third Liberty Loan was the support given it by the farming and rural populations of the country. Not only did the farmers purchase liberally of the bonds, but the rural communities as a rule were more prompt in completing their quotas of the loan than the larger cities. More than 20,000 communities in the United States subscribed or over-subscribed their quotas, many of them on the first day of the campaign. The majority of these were not cities, but country districts.

Iowa, a typical agricultural state, was the first to subscribe its quota, and was followed by Oregon, Arkansas Kentucky and other states in which agriculture is the leading industry.

It is impossible to give accurate figures but it is estimated that while only two per cent of the farming population of the United States subscribed to the first and second loans, probably ten times as many subscribed to the third. The significance is increased by the facts that the heavy subscription was made at a season when the farmers are ordinarily on the borrowing and not on the lending and investing side of the market, and when the farms of the country are speeded up to the limit.

This wide distribution of the third loan among the whole people shows that the body of the nation has become aroused and gone into action—that the sense of duty and the necessity for individual support of the country has permeated the whole people. Secretary McAdoo may justly be enthused over the result and call it the soundest national financing in the world. Every Liberty bond holder is an active force backing the government.

Our soldiers in France and our Allies are heartened and strengthened by the knowledge that 1,000,000 American citizens are backing them with their money, and our enemies must learn with fear and dread of this great reserve force upon which their adversaries can rely.

To keep the good work up the American people must adopt scientific saving methods, save money, save material, save labor, and save time. Thus we will bring the war to an earlier and victorious close and save the lives of American soldiers, and save our rights and liberties and save the world to democracy, justice and civilization.

NATION WIDE ECONOMY

To carry out the program of national economy demanded by the American people by the war they must adopt scientific and systematic methods of economy. Spasmodic and periodic saving will not fulfill the demand upon us.

One method that has been proposed and has the approval of the Treasury Department, is for every American to pledge himself or herself to economize and save, and with the savings at definite periods purchase specific amounts of War Savings Stamps.

We must give our nation, we must give our men in arms, all the strength and support possible. To do this we must cut our own demands on the labor, material, and money of the country to the limit, and increase to the limit the supply of money, material, and labor available to the government. All of our energies and resources should be devoted to the winning of the war, and to accomplish this we must economize, save, and lend to the government.

A definite systematic plan of saving, strengthened by resolve and a pledge to save and lend to the government, will be productive of the best results. The savings plan campaign is now on. Every patriotic American should make a pledge to save and keep the pledge.

SMALL FARM IS HERE AND LIKELY TO STAY

CAN PRODUCE MORE ON SMALL ACREAGE

Modern Methods of Handling the Land Brings More Satisfactory Results.

(By Allen Maull, General Development Agent Atlantic Coast Line.)

Man made his first steps toward civilization when he took a crooked stick and began to till the soil, using first the force of his own muscles. Have you ever stopped to think what a wonderful factor in our civilization and the building of great cities is the humble plow? Our modern civilization rests upon its functions. Strange enough, this work of plowing with which man began his systematic labors remains today his severest toil. For man, as well as animals on the farm, the dusty and monotonous work of plowing is the hardest drudgery. But upon it rests the possible harvest. If it is done well—deep down into the earth and fertility liberated—an abundant harvest is sure to follow.

In the main power is required for three great human needs. First, for changing the shape of materials. Second, for transporting men and materials from place to place. Third, in tilling the soil, and in this field the toil of turning once each year by the plow the face of the whole cultivable earth consumes more power than any other single human need.

The problem of farm power in Florida must be solved. It is one of the fundamental questions now before our farmers. One of the greatest needs on any farm is power, but it is an expense and valuable only in proportion to its profitable rate of production. Further, the farmer's greatest need of power is for plowing, the cost of which must come out of the proceeds from his crops. It is evident, therefore, that any saving thereon becomes profit.

There are only two forms of power available for farm use—horse and machine. The choice of one or the other should depend entirely upon the economy of operation, which includes a number of factors not ordinarily considered.

Accurate records show that to maintain an average work horse requires about $80 per year. This includes his food, bedding, harness, shoeing, etc. Add $10 for depreciation and the total annual cost per horse is $90. The same records referred to above show that the ordinary farm horse averages only about three hours work per day during the working year of 313 days, in spite of the fact that he is a constant care and expense, whether profitably employed or not.

Here is the result of dollars and cents.

The power furnished by one horse cost nine and one-third cents per hour. The power furnished by three horses for ten hours creates an expense of $2.80, or about $1.00 an acre for plowing.

If you go to the root of the proposition, you will find that figure will be twice as high as given, because on the farms of any considerable size it is necessary to have additional horses or mules in order to keep a given number in the field. In other words, you must have a reserve supply of power on hand, which is a constant source of expense, raising the cost of that actually in use.

STAMP SALES COMING SLOW.

Sales of War Savings Stamps during May, up to the 25th, indicate that this month will drop considerably behind April, which was the banner month of the campaign.

The report just issued by State Director Griggs shows that up to the 25th the sales for May total $242,509.40, and that the sales for the week ending on the 25th only total $43,405.43.

This is explained by the intensive drive put on by the Red Cross throughout the state, and it is expected that sales will increase considerably during the last week of the month. Total sales up to date through the postoffices only were $1,115,998.17, which is behind the ratio that sales should have attained up to May 25th.

During the month of June the intensive drive which has already been mentioned will be put on, and it is hoped to either pledge or sell Florida's quota of something over $20,000,000. Plans [illegible] this State are making [illegible] and every county in the state will have an intensive organization to see that they go "over the top." Many have regarded the campaign as a secondary consideration to Liberty Loans, but while the monetary consideration of both is the same, the government regards War Savings as the most important work that the people have been called on to do that has been devised since the war began. In addition to its money producing feature, the encouragement of new savings accounts is by far the most important, but in the Appropriation Bill which passed last October, $2,000,000,000 was set aside to be raised by the sale of War Savings stamps, and it is now necessary to impress the people more intensively with the necessity for purchasing to make up this appropriation.

Following is the report of sales during the week ending May the 25th, together with totals up to that date, as made through the postoffices only:

MORE ABOUT BABY WEEK

Will Florida be the first one of the states to go over the top in saving her quota of children? Her quota has been estimated at approximately nine hundred. Think of it, then think some more! Nine hundred lives to be saved in the state in one year and these all children.

If the people have their hearts in it is work—and undoubtedly they have—it will surely succeed. Of all the children who die under five years of age, 73 per cent die the first year, and of all the children who die the first year, 70 per cent die the first three months, eighty-two per cent the first six months, ninety-four per cent the first nine months.

What is being done about it? For answer attend Baby Week. See what the Committee of the Women's Council of National Defense and physicians of this State are doing to have healthier and better babies and to save more lives of infants and children who are to be future American citizens. Much is being said and done for the Baby campaign and Baby Weeks are in full blast. Such great interest and enthusiasm is shown that good results are bound to follow.

The proud mothers are glad to show their well and perfectly developed babies and the mother with a delicate baby, or one that is suspected of being not normal, anxiously awaits the results of the physician's examination. And this is interesting—intensely so—because the parents are anxious to know and the examining physicians are anxious to find the defects and explain to the mother the nature of the defects—if any exist—so that, if possible, they may be corrected early in life.

The Florida State Health Department wishes to emphasize the great importance at all Baby Weeks—and at all other times—of having the birth of every baby registered. Unless the births are duly registered, it is impossible for the State Vital Statistician to tell the percentage of babies that die.

Every mother should see that her baby is registered. This registration should be done by the attending physician within ten days after birth of the baby, by filling out birth certificate and filing with the local registrar.

We hope that every mother, after attending Baby Week, will take this slogan home with her: "Better babies, better care, is the watchword everywhere."

WHEN PEACE COMES

Some day peace will come. Thousands—millions of men—will suddenly be thrown back again into civil life. Consider the vastness of the adjustment that will be necessary. Look back at the period of reconstruction after our own civil war. Prepare for this new period of reconstruction. The day of reckoning is bound to come. Begin to save now. Thrift is the need of the present, the hope of the future.

Liberty Loan Bonds, War Savings, the safest securities in the world, are a wise provision for the day peace comes.

TAMIAMI TRAIL NOT BE COMPLETED SOON

DELAYS ARE DUE TO SEVERAL CAUSES

Seminole Trail Association Organized At Fort Myers May Act as a Stimulant

Fort Myers, June 16.—That several links in the Tamiami Highway will not be completed in January, 1919, as per schedule, is well known to many of the West Coast, but the public in general is still of the belief that the season 1918-19 will see the cross-state highway from Miami-Fort Myers to Tampa completed. The deferred completion of certain sections of the west coast Tamiami highway to some time in the uncertain future will greatly disappoint the public, but whether the delay is due to lack of [illegible] public spirit or "on account of the war," The fact remains that with the present conditions prevailing indications are that the Lee county part of the highway can not be finished by the time agreed upon, and, furthermore, that after the rainy season is over there will be hardly any more of the Tamiami highway left in Lee county than the right-of-way along the route.

With that outlook to the thousands of motorists who have been promised that they could cross the state from the Atlantic to the Gulf via the Tamiami Trail, and to those who have invested in lands with that promise as a basis for their investments, the prospect will [illegible] disappointing when it is known that some time in 1920 will be nearer the date that the Tamiami trail will be completed to Ft. Myers. Progressive public sentiment aroused and properly led may in some miraculous way accomplish the completion of the highway before the timeahrdlnetaoin highway before that time, but there are no signs indicating that anything as desirable as that will occur. With the upper cross-state roads, Arcadia-Okeechobee-Ft. Pierce, and the Melbourne-St. Cloud-Kissimmee working towards completion, and tourists routed that way, and with the sickening prospect of the loss of another two years' business through the failure to finish the Lee couny link in the Tamiami highway; that, together with the deep desire to see Lee county keep faith with Dade county, to prevent the breach of trust and the loss of prestige and the growing realization of Lee county's great economic annual losses through isolation, compelled the serious investigation which is now leading to a practical solution of the problem of keeping faith with the public in connecting up with the east coast in time for the coming season.

Fast Coast Profits by Good Roads

The remarkable prosperity of the lower east coast is chiefly attributable to efficient civic organization work, unstinted intensive publicity and extensive road construction. To reach across the 'Glades and connect with that progressive region means a new era of development for Lee county far beyond the most sanguine expectations. On the Gulf side lies Lee county with her wonderful natural resources, her rich deep soil, with 4,000,000 feet of pine and cypress untapped with hundreds of thousands of acres of fine grazing land, the magnificent Caloosahatchee bay and river, extensive gulf coast, its Ten Thousand islands, and all this vast natural wealth and opportunities lies hidden and undeveloped, through isolation, absence of outlets and proper road connections with adjoining counties. Further isolation means continued economic losses, the prevention of development, the keeping out of the homeseeker, the tourist and investor, and a check in the normal increase of land values.

From Ft. Myers south and east and southeast there are a number of trails and wagon roads leading out from Immokalee, to Estero and Naples-on-the Gulf, Marco on the southwest, Deep Lake and Chokoloskee on the south and to Rocky Lake, the Devil's Garden, Brown's store, Fort Shackleford and paralleling the western edge of the Everglades down to the Tamiami highway, where it crosses the Lee and Dade county lines. Some of these wagon roads were made during the Seminole war and have been used since during the hunting season by hundreds of automobile parties. This Seminole trail, or military road from Ft. Myers to Immokalee and Ft. Shackleford can, at very little expense, and by simply "corduroying" soft places along the route, be put into service and used as trans-state connection pending the completion of the Tamiami highway, thus advancing the development expected from the permanent cross-state road two years.

The route is shown on "Davis" military map as "Captain Kerr's route, 1842," and starts at Ft. Myers at an elevation of 7.68, gradually raises to 37.07 at Immokalee (Tp. 47, R. 29) the highest point on the mainland in the county. From there in an easterly and southeasterly direction it gradually slopes to 28 and 24 at Rocky Lake (Tp. 47, R. 32) to 21-20 at Fort Shackleford near the western borders of the 'Glades, then 2paralleling the Everglades through Townships 49-53, R. 34, it passes southward along the prairie and holds its elevation between 18-17 until it finally slopes to 6.50 feet at the juncture of the Dade and Lee county lines on the route of the Tamiami highway (Tp. 53, R. 35 E.)

Seminole Trail Route Scenic Wonder

Travelers along this Seminole Trail are never disappointed, as the route is a scenic one, abundant in wild animal life, prolific in vegetation, lots of fine standing timber, rich grazing land, fine cattle, wild orange groves, artesian wells, etc., and there is hardly a more picturesque and interesting route in the state of Florida. A part of the trail passes through the proposed game preserve covering several townships and which is a natural breeding and feeding ground for game, and its bird life is marvelous in number and plumage. Thousands of sportsmen of different parts of the United States and Canada motor along this trail every winter, and along this route it is proposed that Fort Myers connect with the Dade county part of the Tamiami highway when it is completed in January.

The Seminole Trail Association has been organized and officers elected, with headquarters at Fort Myers. The completed part of the Dade county-Tamiami highway, and also for the advancement of roads connecting with neighboring counties. The efforts of the association are not in conflict with any other project but to stimulate those already under consideration. No project has hardly ever met with more unanimous response by the public, and all those to whom the proposition has been submitted have agreed that it is practicable and necessary. Civil engineers and others have offered their services gratis, land owners both in Lee and Dade counties have volunteered financial assistance. A preliminary survey is under way in order to arrive at the proper amount necessary to route and make the trail travelable for all kinds of automobiles in order to make connections with Dade county by January next. The material for the improvement can be found along the route, and the labor is being arranged for.

When the economic advantages offered by the Seminole Trail are probably studies and understood it will be given the full force of public appreciation and by connecting the Seminole Trail with the Tamiami highway at the Dade and Lee county line, connections can be made:

1. Via La Belle with Fort Myers, Moore Haven, Palmdale, Okeechobee City, and Fort Pierce, and with Tampa through Arcadia, Lakeland, etc.
2. Via Alva, Olga Bridge with Punta Gorda, Arcadia, Lakeland to Tampa.
3. Via Fort Myers to Naples-on-the-Gulf and Marco, thus connecting Miami, all the Caloosahatchee river towns and those along the Tamiami highway to Marco, as well as the towns between Fort Myers and Tampa.

THE KAISER TALKS TO HELL

The Kaiser called the Devil up
On the telephone one day;
The girl at central listened
To all they had to say.

"Hello," she heard the Kaiser's voice,
"Is Old Man Satan at home;
Just tell him it is Kaiser Bill
That wants him on the phone."

The Devil said "Hello" to Bill;
And Bill said "How are you?—
I'm running here a Hell on earth,
So tell me what to do."

"What can I do," the Devil said,
"My dear old Kaiser Bill,
If there is a thing I can do,
To help you I surely will."

The Kaiser said: "Now listen
And I will try to tell
The way I am running
On earth a modern Hell."

My army it went through Belgium,
Shooting women and children down,
We tore up all the country,
And blew up all the towns.

"My Zeps dropped bombs on cities,
Killing both old and young;
And those the Zeppelins didn't get,
Were taken out and hung.

"I started out for Paris,
With the aid of poisonous gas;
But the Belgians, darn em, stopped us,
And wouldn't let us pass.

My submarines are devils,
Why, you should see them fight.
They go sneaking through the sea,
And sink the ships at night.

"I was running things to suit myself,
Till a year or so ago,
When a man named Woodrow Wilson
Wrote me to go more slow.

"He said to me: "Now William,
We don't want to make you sore,
So be sure to tell your U-boats
To sink our ships no more.'

"We have told you for the last time,
So now, Bill, it's up to you,
And if you don't stop it,
You'll have to fight us too.

"I did not listen to him,
And he's coming after me;
With a million Yankee soldiers,
From their homes across the sea."

"Now, that's why I called you, Satan,
For I want advice from you,
For I know that you would tell me
Just what I ought to do.

"My dear old Kaiser William,
There's not much for me to tell;
For the Yanks will make it hotter
Than I can for you in Hell.

"I've been a mean old Satan,
But not half as mean as you,
And the minute that you get here,
I will give my job to you.

"I'll be ready for your coming,
And I'll keep the fires all bright,
And I'll have your room all ready
When the Yanks begin to fight.

"For the boys in khaki will get you,
I have nothing more to tell,
Hang up the phone, go get your hat,
And meet me here in Hell."

GO INTO BATTLE COOL AND BRAVE

IS VETERAN'S ADVICE TO YOUNG SOLDIERS

Declares Courageous Spirit Will Carry The Day Against Overwhelming Odds

In strong and pious words, H. Augustus Baxter addresses a discourse to the men who will be called for service in the great war, giving his views from the standpoint of the earnest student of the Gospel, and a man who has four years experience in a great conflict. His letter follows:

Safety Harbor, Fla., July 4, 1917.
To the Editor of the Tribune:

To those who registered and will be called to go, especially to a foreign country, I send greetings, and will say that you have my heartfelt sympathy and I fully realize, and everyone of you must realize that it is no small responsibility that you have taken upon yourselves, and will say that I had nearly four years experience in this line in the worst war that was ever fought on the earth up to that time, and I want to give you a few words of advice and encouragement. When there is any duty assigned to you, do not put on a long face, but accept gracefully and go at it, not like it was a task, but a privilege, and that course will bring you favors and when you meet a comrade, especially one of your company, have a pleasant word for him and he will soon catch on, for kind words are catching; and if you find two that are trying to get into a scrap, do all in your power to keep them out of it, and if you succeed just think of what our Saviour said; "Blessed are the peacemakers, for they shall be called the children of God;" and again, "A soft answer turneth away wrath, but grievous words stir up anger." Treat your commissioned officers with all the respect that is due them and look pleasant, and this will bring a reward sooner or later. Treat everyone kindly with whom you come in contact, even prisoners who happen to fall in your hands, and you will sleep better at night and you will not fear the enemy's bullets so much when in battle. It is too bad that you have to go, but war seems to be one of the elements of the atmosphere at this time and it seems that governments can not very well avoid it. We are under the three Woe Trumpets of Rev. 8:13. We read: "Wo,e woe unto the inhabitants of the earth by reason of the other voices of the three trumpets of the three angels that are yet to sound."

And again John says: "I saw three unclean spirits like frogs come out of the mouth of the dragon and out of the mouth of the beast and out of the mouth of the false prophet, for they are the spirits of devils working miracles which go forth to the kings of the earth and of the whole world to gather them to the battle of the great day of God Almighty."

These things were written for our time and this is but a small part of the evidence, and if so, how could the elements help but be fulfilled with war, and again, if this is so, war will be the all prevailing element in or with the nations, and war can not be carried on without soldiers, and to carry on war successfully we must have the very best men of the nation.

And remember that our government has done more for its soldiers than any country in the world.

Let strong drink entirely alone. It is deceiving and will bring you into trouble sooner or later, and when you get into battle "quit yourselves like men" and do not get excited—be cool as when you start in to do a day's work, and if you see anything to laugh at, laugh and it will give your comrades courage and may stop some of them from shooting into the tree tops, and remember if there is any place that you are to be depended upon it should be in battle. You know the words of Patrick Henry, "The battle is not to the strong, but to the active, the vigilant and the brave." Good officers that have the gift of encouraging the men in time of battle (not by words but by their doing and actions) will often end in victory where otherwise it might have been a defeat. And always remember that there is more danger in defeat than in victory, and too, that you are fighting for the best country in the world.

In order to make some things that I have written more emphatic, I mention some facts from history of the wars of Alexander the Great. He conquered the world, and history states that he never had an army of over 30,000 men, and he met the Medo Persians at two different times with 300,000 and put them to flight, and the last time at Arabella, the king fell on his own sword and killed himself, and thus and at that time he (Alexander) became emperor of the world, but he could not control himself and died at the age of 33 from the effects of strong drink. But to show you that it was not all Alexander, years before this, when they had no king, if my memory serves me right, the Medo Persians came against this little country of Greece with a million men, but their fleet was destroyed in a storm and the battle was put over till spring, and on the field of Marathon, with 25,000 men, they whipped the Persians and started them home, no doubt a wiser set of men. But they did not have gun powder nor machine guns to face, but you will no doubt have plenty of ammunitnon at hand at all times and I am sure you will know how to use it.

H. AUGUSTUS BAXTER.

Germany's hope now lies in the potato crop, says an exchange. A year ago she was pinning her faith exclusively to the ammunition crop.

Late reports from France have spurred many a slow thinker into buying Thrift Stamps.
